Findings: The Floodplain and Wetlands Assessment concluded that these activities would have no significant effects on the 100-year or 500-year floodplains and associated wetlands of the Colorado River and Moab Wash. Risks to human health, property, and the environment will not be increased as a result of these actions. DOE will allow 15 days after publication of this Statement of Findings before implementing these proposed actions.

SUPPLEMENTARY INFORMATION:

- III. Request for Comments

I. Background

The Federal Energy Administration Act of 1974 (Pub. L. 93–275, 15 U.S.C. 761 *et seq.*) and the DOE Organization Act (Pub. L. 95–91, 42 U.S.C. 7101 *et seq.*) require the EIA to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35), provides the general public and other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Any comments received help the EIA to prepare data requests that maximize the utility of the information collected, and to assess the impact of collection requirements on the public. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) under Section 3507(a) of the Paperwork Reduction Act of 1995.

The weekly petroleum supply surveys (Forms EIA–800, EIA–801, EIA–802, EIA–803, and EIA–804) are designed to highlight information on petroleum refinery operations, inventory levels,
