

Remediation Services, SAS produces estimates of revenue by detailed North American Product Classification System (NAPCS) products. Inventory estimates for selected industries in the Information sector are produced, as well as estimates of expanded revenues for selected industries across multiple sectors. For industries with a significant non-profit component, separate estimates are developed for taxable firms and organizations exempt from Federal income tax.

These data are needed to provide a sound statistical basis for the formation of policy by various governmental agencies. The Census Bureau is authorized by Title 13, United States Code, to conduct surveys necessary to furnish current data on subjects covered by the major censuses. These surveys provide continuing and timely national statistical data for the period between economic censuses.

The Bureau of Economic Analysis, the primary Federal user of these annual program statistics, uses the information in developing the national income and product accounts, compiling benchmark and annual input-output tables, and computing Gross Domestic Product by industry. The Bureau of Labor Statistics uses the data as inputs to its Producer Price Indexes and in developing productivity measurements. The Centers for Medicare and Medicaid Services use the data in the development of the National Health Expenditure Accounts. The Federal Communications Commission uses the data as a means for assessing FCC policy. The Census Bureau uses the data to provide new insight into changing structural and cost conditions that will impact the planning and design of future economic census questionnaires. Private industry also uses the data as a tool for marketing analysis.

Data are collected from all of the largest firms and from a sample of small- and medium-sized businesses selected using a stratified sampling procedure. The samples are reselected periodically, generally at 5-year intervals. The largest firms continue to be canvassed when the sample is redrawn, while nearly all of the small- and medium-sized firms from the prior sample are replaced. We collect these data by using a mail-out/mail-back and online survey questionnaire.

The Census Bureau is expanding the industry coverage of the SAS to include Utilities (NAICS 22) and Educational Services (NAICS 61); and the rest of Transportation (NAICS 48); Finance and Insurance (NAICS 52); and Real Estate and Rental and Leasing (NAICS 53) not currently covered by SAS. For expanded

industries, the survey will produce estimates of total operating revenue and both total and detailed operating expenses. This expansion will increase the size of the survey sample by about 30 percent.

II. Method of Collection

The Census Bureau collects this information by mail, Internet, fax, and telephone follow-up.

SUPPLEMENTARY INFORMATION:

I. Abstract

The U.S. Census Bureau conducts a quarterly survey of service industry production—the Quarterly Services Survey (QSS). The QSS is a principal economic indicator series that produces, for selected service industries, quarterly estimates of total operating revenue and the percentage of revenue by class of customer. The survey also produces estimates of total operating expenses from tax-exempt firms in industries that have a large not-for-profit component. In addition, for hospital services, the survey estimates the number of inpatient days and discharge admissions. Current selected service industries include information services; professional scientific and technical services; hospitals; nursing and residential care facilities; administrative and support and waste management and remediation services; ambulatory health care services; social assistance; credit intermediation and related activities; securities, commodity contracts, and other financial investments and related

activities; truck transportation; courier and messengers; warehousing and storage; rental and leasing services; arts, entertainment, and recreation; and other services except public administration.

Data are collected from all of the largest firms and from a sample of small- and medium-sized businesses selected using a stratified sampling procedure. Each quarter the sample is updated to reflect the addition of new business births and firms and organizations that have gone out-of-business.

The Bureau of Economic Analysis uses data gathered in this survey in developing its quarterly Gross Domestic Product (GDP) and GDP by industry estimates. The data provide the Federal Reserve Board and Council of Economic advisors with timely information to assess current economic performance. Other government and private stakeholders also benefit from a better understanding of important cyclical components of our economy.

We are expanding the industry coverage of the QSS to include utilities; air transportation; water transportation; transit and ground passenger transportation; pipeline transportation; scenic and sightseeing transportation; support activities for transportation; monetary authorities-central bank; insurance carriers and related services; real estate; lessors of nonfinancial intangible assets (except copyrighted works); and educational services. For expanded industries, the survey will produce estimates of total operating revenue and operating expenses from the tax-exempt firms in industries that have a large not-for-profit component.

II. Method of Collection

The Census Bureau will collect this information by mail, fax, Internet, and a telephone follow-up.

Certain Lined Paper Products from India: Notice of Final Results of the First Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On October 7, 2008, the Department of Commerce (the Department) published the preliminary results of the antidumping duty administrative review for certain lined paper products (CLPP) from the India.¹ This review covers two mandatory respondents, Kejriwal Exports and Kejriwal Paper Limited (Kejriwal), and Ria ImpEx Pvt. Ltd. (Ria), and 17 other manufacturers and exporters of the subject merchandise (collectively,

respondents).² The period of review (POR) is April 17, 2006, through August 31, 2007.

Based on our analysis of the comments received, we have made changes to Kejriwal's margin. For these final results, we find that Kejriwal sold subject merchandise at prices below normal value (NV) during the POR. Because it is above *de minimis*, we are applying the calculated weighted-average margin for Kejriwal from this review to those companies that were covered by this review but were not selected for individual examination (non-selected respondents). Therefore, the final results differ from the *Preliminary Results* with respect to Kejriwal and the non-selected respondents. However, we continue to apply an adverse facts available rate of 23.17 percent to Ria.

EFFECTIVE DATE: April 14, 2009.
