II. What Action is the Agency Taking

This notice announces receipt by the Agency of requests from the American Mushroom Institute, Amvac Chemical Corp., Pursell Industries Inc., the Scotts Company, Value Garden Supply LLC, and Voluntary Purchasing Groups Inc., to cancel all pesticide products registered under sections 3 and 24(c) of FIFRA. These registrations are listed in the following table.

A. Background Information

Benomyl, is a benzimidazole carbamate and systemic foliar fungicide registered for use on apples, apricots, bean vine, blueberries, caneberries (raspberries, blackberries, boysenberries, loganberries, and dewberries), celery, cherries, citrus, cucurbits (cucumber, melons, pumpkins, and squash) mangoes, mushrooms, nectarines, peaches, and tomatoes.

The technical registrant, E.I. du Pont de Nemours & Company met with the Agency on April 18, 2001, and requested a voluntary cancellation of all their registrations for products containing benomyl, to be effective December 31, 2001. Dupont stated that this decision was based on business reasons. The 6(f)(1) comment period announcing the request for voluntary cancellation of Dupont benomyl registrations opened on May 23, 2001 and ended on June 22, 2001. Seven public comments were received and addressed. The cancellation order was published in the **Federal Register** and became effective on August 8, 2001.

The Agency has also received letters from the following registrants requesting voluntary cancellation of all their products containing benomyl: American Mushroom Institute, Amvac Chemical Corp., Pursell Industries, Inc., the Scotts Company, Value Garden Supply LLC, and Voluntary Purchasing Groups, Inc.

In their letters, Pursell and Amvac stated that they no longer manufactured or distributed end-use products that contained benomyl and therefore, no end-use products should be in the channels of trade. Likewise, in their letter, Value Garden Supply noted that their end-use products that contain

benomyl are no longer being sold. Value Garden Supply is not aware of any stocks of the products in the channels of trade. The American Mushroom Institute requested cancellation of its 24(c) registration. The reason was due to the effective cancellation of all Dupont registrations that contain benomyl on August 8, 2001. The Scotts Company and Voluntary Purchasing Group had end-use products that were suspended on April 13, 1994 and May 20, 1998, respectively. Both registrants failed to comply with a data call-in that was issued on June 16, 1992. The Agency, contacted both Scotts and Voluntary Purchasing to notify them that Dupont canceled all registrations for benomyl.

Both registrants submitted letters stating that they would voluntarily cancel their registrations.

B. Requests for Voluntary Cancellation

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180-day comment period on a request for voluntary termination of any minor agricultural use before

granting the request, unless the registrants request a waiver of the comment period, or the Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment. The registrants have requested that EPA waive the 180-day comment period. EPA is granting the registrants' request to waive the 180-day comment period. Therefore, EPA will provide a 30-day comment period on the proposed requests. EPA anticipates granting the cancellation request shortly after the end of the 30-day comment period for this notice. The registrations for which cancellations were requested are identified below.

III. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA, provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled. FIFRA section 6(f)(1) further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**, make reasonable efforts to inform persons who rely on the pesticide for minor agricultural uses, and provide a 30-day period in which the public may comment. Thereafter, the Administrator may approve such a request.

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of

any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in the **Federal Register** of June 26, 1991 (56 FR 29362) (FRL-3846-4). Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and

released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, the Agency intends to permit existing stocks already in the hands of dealers or users to be distributed, sold, or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product. Exception to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in a Special Review action, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

VI. Future Tolerance Revocations

EPA anticipates drafting a future **Federal Register** notice proposing revocation of tolerances on commodities, which no longer have registered uses of benomyl. In this notice, EPA seeks comment as to whether any individuals or groups want to support continuation of these tolerances.

I. Background

WorldCom, Inc., a telecommunications company incorporated in the State of Georgia and located at 500 Clinton Center Drive, Clinton, Mississippi 39056, disclosed, pursuant to the EPA "Incentives for Self-Policing: Discovery, Disclosures, Correction and Prevention of Violations" ("Audit Policy"), 65 FR 19618 (April 11, 2000), that they failed to prepare SPCC plans for seventy-five facilities where they stored diesel oil in above ground storage tanks, in violation of the CWA section 311(b)(3) and 40 CFR Part 112. WorldCom disclosed that for one hundred and six facilities they had failed to obtain operating permits or exemptions in violation of CAA section 110, 42 U.S.C. 7410, and various SIP requirements for emergency generators. WorldCom disclosed that at three hundred and ninety-four facilities they had: (1) Failed to file emergency planning notifications with the SERC and failed to provide the name of an emergency contact to the LEPC, in violation of EPCRA sections 302-303, 42 U.S.C. 7413(a)(1); (2) failed to submit MSDS' or a list of chemicals to the LEPC, SERC, and the fire departments with jurisdiction over the facilities, in violation of EPCRA section 311, 42 U.S.C. 11021; and (3) failed to submit an Emergency and Hazardous Chemical Inventory to the LEPC, SERC, and fire departments with jurisdiction over the facilities, in violation of EPCRA section 312, 42 U.S.C. 11022.

EPA determined that WorldCom met the criteria set out in the Audit Policy for a 100% waiver of the gravity component of the penalty. As a result, EPA waived the gravity based penalty (\$3,888,207) and proposed a settlement penalty amount of one hundred and forty-three thousand, five hundred and twenty dollars (\$143,520). This is the amount of the economic benefit gained by WorldCom, attributable to their delayed compliance with the SPCC, CAA and EPCRA regulations. WorldCom, Inc. has agreed to pay this amount. EPA and WorldCom negotiated and signed an administrative consent
