Comments

A 60-day public comment Notice was published in the **Federal Register** on July 16, 2004. This comment period ended September 14, 2004 and resulted in one comment being received. The comment indicated that the burden hours estimate of four (4) was low for the project application, and a suggestion was made to change the number of burden hours to twelve (12). This year, we are adding performance measurement as an application requirement, which, based on a pilot of this effort, has an impact upon the burden hours. Following consultation with program management staff with daily oversight over the applications, and with representatives of organizations routinely asked to fill out the applications, a determination was made to increase the estimated burden hours to nine (9) hours as an appropriate estimate of the average number of hours needed to complete the proposed application.

Type of Review: Revision of a currently-approved collection.
