8. *Applicant;* Permit Application No. 2002–014

Robert Semper, Exploratorium, 3601 Lyon Street, San Francisco, CA 94123

Activity for Which Permit Is Requested

Enter Antarctic Specially Protected Areas. The applicant proposes to enter several Antarctic Specially Protected Areas for the purpose of filming scientific research in the field and document the historic huts in the Ross Island vicinity. The applicant proposes to enter the Cape Royds penguin rookery (ASPA 121) to film researchers working with Adelie penguins. In addition, the applicant proposes to enter and film the historic huts and environs at Cape Evans (ASPA 154), Cape Royds (ASPA 156), and Discovery Hut at Hut Point (ASPA #157). The film project is an effort to create a different approach to telling the story of basic scientific research and the infrastructure it takes to support it to a vast audience of museum and online visitors. Viewers, by means of a webcast, will have the opportunity to metaphorically look over the shoulder of scientists as they work in the field or laboratory. In addition, filming the huts will add the element of history and adventure for those who are not normally interested in scientific activities.

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

- 1. Type of submission, new, revision, or extension: Revision.
- 2. The title of the information collection: Proposed Rule, 10 CFR Part 50, Releasing Part of a Power Reactor Site or Facility for Unrestricted Use Before the NRC Approves the License Termination Plan.
- 3. *The form number if applicable:* Not applicable.
- 4. How often the collection is required: Each time a licensee requests

NRC approval of a release of part of its site or facility (partial site release) before NRC approval of its LTP.

5. Who will be required or asked to report: Power reactor licensees.

6. An estimate of the number of responses: An average of two partial site releases each year.

7. The estimated number of annual respondents: Two.

8. An estimate of the total number of hours needed annually to complete the requirement or request: Part 50: 934 hours (for each of 2 partial site releases: 438 hours reporting + 24 hours recordkeeping; + 10 hours for update of one LTP submittal); Part 51: 240 hours (120 hours per response).

9. An indication of whether section 3507(d), Pub. L. 104–13 applies:

Applicable

10. Abstract: The NRC is amending its regulations in part 50 to establish a process for allowing power reactor licensees to release part of their site for unrestricted use before receiving approval of their License Termination Plan (LTP). The proposed rule would add section 50.83 to 10 CFR Part 50 describing the criteria and the regulatory framework that a power reactor licensee must use to request NRC approval for a partial site release. The proposed new section would allow licensees to submit a letter request or, depending on radiological conditions, a license amendment application. In either case, the submittal would document the licensee's completion of a number of evaluations, surveys, recordkeeping, and reporting that would establish licensee compliance with health and safety considerations.

Submit, by September 28, 2001, comments that address the following questions:

- 1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
 - 2. Is the burden estimate accurate?
- 3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the submittal may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O–1 F23, Rockville, MD 20852. The proposed rule indicated in "The title of the information collection" is or has been published in the Federal Register within several days of the publication date of this Federal Register Notice.
