

2007. Appropriate activities will occur once the Draft EIS is available for review, which is expected to occur in the late summer of 2007.

Preliminary Issues: Because the conveyance of land will not significantly change the expected land use of the transferred lands, no significant issues have been identified. Reconstruction of FR 416v has the potential to affect known cultural resource sites located within the existing roadway. Because the sites and road occupy land between a canyon wall and steep ground, options to avoid these sites are limited, and so data recovery is the likely method for mitigating impacts. No threatened or endangered species—or Region 3 sensitive species—of animal or plant are known in the project area. Likewise, no Region 3 sensitive species are known. Because the National Forest System lands would be closed to the general public once conveyed to the Pueblos, a change in recreational use patterns is likely. A closed pumice mine exists on the land to be conveyed to the San Ildefonso Pueblo, with reclamation underway. Any unfinished reclamation will pass to the Secretary of the Interior pursuant to the Act, Section 7(f).

Comment Requested: This notice of intent initiates the scoping process that guides the development of the environmental impact statement. The Forest Service invites written comments and suggestions on the proposed action, including any issues to consider, as well as any concerns relevant to the analysis.

Early Notice of Importance of Public Participation in Subsequent Environmental Review: A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City*

of Angoon v. Hodel, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement. To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.
