

CCAC Petition asserts that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

On April 10, 2019, the EPA Administrator issued an Order denying the Petitions. The Order explains the basis for the EPA's decision.

Sections 307(b) and 505(b)(2) of the CAA provide that a petitioner may request judicial review of those portions of an order that deny issues in a title V petition. Any petition for review shall be filed in the United States Court of Appeals for the appropriate circuit no later than July 22, 2019.

Dated: May 6, 2019.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Miscellaneous Organic Chemical Manufacturing (40 CFR part 63, subpart FFFF) were proposed on April 4, 2002, and promulgated on July 14, 2006. These regulations apply to both existing facilities and new facilities that manufacture a miscellaneous organic chemical and that are located at, or are part of, major sources of hazardous air pollutant (HAP) emissions. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart FFFF.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or

malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities:

Miscellaneous organic chemical manufacturing facilities.

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart FFFF).

Estimated number of respondents:

202 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 327,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$41,600,000 (per year), which includes \$4,310,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens; this decrease is not due to any program changes. The decrease in burden is due to more accurate estimates of existing sources based on information gathered by EPA and confirmed by industry. The decrease in the number of respondents also results in a decrease in responses and operation and maintenance costs.

Courtney Kerwin,

Director, Regulatory Support Division.
