**Title:** E-Government Web site Customer Satisfaction Survey (Formerly American Customer Satisfaction Index (ACSI) E-Government Web site Customer Satisfaction Survey)

**OMB Control Number:** 1090-0008

**Abstract:** The proposed renewal of this information collection provides a means to consistently assess, benchmark and improve customer satisfaction with Federal Agency Web sites within the Executive Branch. The Federal Consulting Group of the Department of the Interior serves as the executive agent for this methodology and has partnered with ForeSee Results, Inc., to offer this assessment to Federal Agencies.

ForeSee Results is a leader in customer satisfaction and customer experience management on the web. Its methodology (Customer Experience Analytics or CXA) is a derivative of the most respected, credible, and well-known measure of customer satisfaction in the country, the American Customer Satisfaction Index (ACSI). This methodology combines survey data and a patented econometric model to precisely measure the customer satisfaction of Web site users, identify specific areas for improvement and determine the impact of those improvements on customer satisfaction and future customer behaviors.

The ForeSee CXA methodology is the only cross-agency methodology for obtaining comparable measures of customer satisfaction with Federal Government Web sites. The ultimate purpose of this methodology is to help improve the quality of goods and services available to American citizens, including those from the Federal Government.

The E-Government Web site Customer Satisfaction Surveys will be completed subject to the Privacy Act of 1974, Public Law 93-579, December 31, 1974 (5 U.S.C. 522a). The agency information
