Availability of U.S. Patents for Non-Exclusive, Exclusive, or Partially-Exclusive Licensing

AGENCY: U.S. Army Research Laboratory, Adelphi, Maryland, DoD.

ACTION: Notice.

SUMMARY: In accordance with 37 CFR 404.6, announcement is made of the availability of the following U.S. patent for non-exclusive, partially exclusive or exclusive licensing. The listed patent has been assigned to the United States of America as represented by the Secretary of the Army, Washington, DC.

This patent covers a wide variety of technical arts including: A method for determining the trajectory of a projectile.

Under the authority of section 11(a)(2) of the Federal Technology Transfer Act of 1986 (Pub. L. 99–502) and section 207 of Title 35, United States Code, the Department of the Army as represented by the U.S. Army Research Laboratory wish to license the U.S. patent listed below in a non-exclusive, exclusive or partially exclusive manner to any party interested in manufacturing, using, and/or selling devices or processes covered by this patent.

Title: Method of Passive Determination of Projectile Miss Distance.

Inventors: David B. Hills and Jonathan A. Bornstein.

Patent Number: 6,125,308.

Issued Date: September 25, 2000.

FOR FURTHER INFORMATION CONTACT: Norma Cammaratta, Technology Transfer Office, AMSRL–CS–TT, U.S. Army Research Laboratory, Adelphi, MD 20783–1197 tel: (301) 394–2952; fax: (301) 394–5818.

SUPPLEMENTARY INFORMATION: None.

John A. Hall,

Alternate Army Federal Register Liaison Officer.

Intent To Prepare a Supplement to the 1992 Final Environmental Impact Statement on Modified Water Deliveries to Everglades National Park (MWD Project) To Address a Change in Design of the Levee 67 and Levee 29 Water Conveyance Features Within Water Conservation Area 3 (WCA 3), Including a Combined Operational Plan for the MWD and Canal 111 (C–111) Projects

AGENCY: U.S. Army Corps of Engineers, Department of Defense.

ACTION: Notice of intent (amendment).

SUMMARY: Reference the previous Notice of Intent published in the Federal Register of September 24, 1999 (V.64, No. 185: pages 51740–51741). The congressionally authorized MWD Project consists of structural modifications and additions to the existing C&SF Project required to improve water deliveries for ecosystem restoration of Everglades National Park (Park). The authorized plan calls for construction of six water control structures in Levee 67 (L–67) and its adjacent canal, which partition WCA 3 into two basins, WCA 3A and WCA 3B and two recently constructed structures in L–29. At the request of the local sponsor, the South Florida Water Management District (SFWMD), the Corps will be revaluating the design of the water conveyance features and addressing the need for water seepage control for WCA 3B. The authorized C–111 Project consists of Water Pumping Stations and associated canals and water detention areas within the C–111 Basin immediately south of the MWD Project limits down to tidewater. This amendment provides for the addition to the SEIS of a Combined Operational Plan for the MWD and C–111 Projects.

FOR FURTHER INFORMATION CONTACT: U.S. Army Corps of Engineers, P.O. Box 4970, Jacksonville, Florida 32232; Attn: Mr. Elmar Kurzbach, 904–232–2325.

SUPPLEMENTARY INFORMATION: 1. Alternatives to be evaluated involve combinations of gated water control structures, passive structures (fixed-crest weirs), levee removal, and canal filling to convey water from WCA 3A into WCA 3B and from WCA 3B into Northeast Shark River slough and operation of the overall system down to tidewater. Seepage control alternatives involve combinations of new operational and structural elements such as pump stations.

2. A Scoping letter and public Scoping Meeting will be used to invite comments on alternatives and issues from Federal, State, and local agencies, affected Indian tribes, and other interested private organizations and individuals.

3. The Draft SEIS will analyze issues related to recreational fishing access, WCA 3B tree island flooding, introduction of poor quality water, Everglades National Park ecosystem restoration, and agricultural and residential flood protection.

4. The alternative plans will be reviewed under provisions of appropriate laws and regulations, including the Endangered Species Act, Fish and Wildlife Coordination Act, Clean Water Act, and Farmland Protection Policy Act.

5. The Draft SEIS is expected to be available for public review in the 3rd quarter CY 2001.

Dated: December 20, 2000.

James C. Duck,

Chief, Planning Division.

Intent To Prepare a Draft Environmental impact Statement (DEIS) for a Flood Damage Reduction Study, Kansas Citys, Missouri and Kansas

AGENCY: U.S. Army Corps of Engineers, Kansas City District, DoD.

ACTION: Notice of intent.

SUMMARY: the Kansas Citys, Missouri and Kansas, Local Flood Protection Project is an existing flood damage reduction project comprised of 7 existing levee units: Argentine Levee Unit; Armourdale Levee Unit; Birmingham Levee Unit; Central Industrial District (CID) Levee Unit; East Bottoms Levee Unit; Fairfax-Jersey Creek Levee Unit; and the North Kansas City Levee Unit. The purpose of this study is to consider the economic, environmental, and social impacts that may occur as a result of various alternatives being considered in a flood damage reduction study, concerning flood protection provided by the existing Kansas Citys, Missouri and Kansas, Local Flood Protection Project to determine if increases in flood protection are warranted, under the authority of Section 216 of the 1970 Flood Control Act, Kansas City, Missouri and Kansas City, Kansas.
