SUPPLEMENTARY INFORMATION:

Background

Keechelus Dam was constructed at the lower end of a natural lake on the Yakima River about 10 miles northwest of Easton, Washington, in Kittitas County. This earthfill structure was constructed between 1913 and 1917 and is approximately 6,550 feet long with a maximum height of 128 feet. It creates a reservoir with an active storage capacity of 158,000 acre-feet.

In June 1998, during the excavation of a trench for a telephone line conduit, a void was found in the crest of Keechelus Dam. This discovery led to further geotechnical investigations, including ground penetrating radar and geologic exploration activities, to determine the condition of the overall dam. Subsequent investigations identified more than 40 potential void sites and significant evidence of dam embankment deterioration from seepage which could lead to embankment failure. As an interim safety measure, Keechelus Reservoir has been operated at a restricted full pool elevation 7 feet below the normal full pool elevation since November 1998, with increased technical monitoring and surveillance at the dam.

The scope of this document will focus on correcting the dam safety deficiencies at Keechelus Dam to protect property and the lives of people living downstream from the dam, and evaluating the potential impacts associated with the proposed alternatives. Correcting the SOD

deficiencies in no way restricts potential future modifications to the structure.

Public Involvement

Reclamation plans to conduct public scoping meetings to solicit input on the alternatives developed to correct safety deficiencies at Keechelus Dam and to identify potential issues and impacts associated with those alternatives. Reclamation will summarize comments received during the scoping meetings and from letters of comment received during the scoping period, identified under **DATES**, into a scoping summary document which will be made available to the public.

Dated: March 24, 2000.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-469 (Review)]

Electroluminescent Flat Panel Displays From Japan

Determination

On the basis of the record¹ developed in the subject five-year review, the United States International Trade Commission determines, pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)), that revocation of the antidumping duty order on electroluminescent flat panel displays from Japan would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.²

Background

The Commission instituted this review on August 2, 1999 (64 FR 41951, August 2, 1999) and determined on November 4, 1999 that it would conduct an expedited review (64 FR 62688, November 17, 1999). The Commission transmitted its determination in this review to the Secretary of Commerce on March 27, 2000. The views of the Commission are contained in USITC Publication 3285 (March 2000), entitled *Electroluminescent Flat Panel Displays from Japan: Investigation No. 731-TA-469 (Review)*.

¹ The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

² Commissioners Askey and Okun dissenting. Vice Chairman Miller did not participate in this five-year review.

Issued: March 27, 2000.

By order of the Commission.

Donna R. Koehnke,

Secretary.
