

SUPPLEMENTARY INFORMATION:**Title**

Information Collection for New Stationary Sources Hospital/Medical/ Infectious Waste Incinerators, 40 CFR part 60, subpart Ec., OMB Control Number 2060-0363, expiring 9/30/01. This is a request for extension of a currently approved collection.

Abstract

Hospital/Medical/Infectious Waste Incinerators (HMIWI), burning hospital waste and/or medical infectious waste are subject to specific reporting and recording keeping requirements. Notification reports are required related to the construction, reconstruction, or modification of an HMIWI. Also required are one-time-only reports related to initial performance test data and continuous measurements of site-specific operating parameters. Annual compliance reports are required related to a variety of site-specific operating parameters, including exceedance of applicable limits. Semi-annual compliance reports are required related to emission rate or operating parameter data that were not obtained when exceedances of applicable limits occurred. Affected entities must retain for five years the reports and records that are required under 40 CFR part 60, subpart Ec and 40 CFR part 60, subpart—General Provisions.

Co-fired combustors and incinerators burning only pathological, low-level radioactive, and/or chemotherapeutic waste are required to submit notification reports of an exemption claim, and an estimate of the relative amounts of waste and fuels to be combusted. These co-fired combustors and incinerators are also required to maintain records on a calendar quarter basis of the weight of hospital waste combusted, the weight of medical/infectious waste combusted, and the weight of all other fuels combusted.

All reports required under the New Source Performance Standard (NSPS) and the General Provisions are submitted to the respondent's state, tribal, or local agency, whichever has been delegated enforcement authority by the EPA. The information is used by EPA solely to determine that all sources subject to the NSPS are in compliance with the NSPS and that the control system installed to comply with the standards is being properly operated and maintained. Based on reported information, EPA can decide which facilities should be inspected and what records or processes should be inspected at the facilities. The records that sources maintain would indicate to

EPA whether facility personnel are operating and maintaining control equipment properly. The NSPS for HMIWIs requires initial notifications, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any start-up, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required of all sources subject to NSPS. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on April 12, 2001; (66 FR 18927); no comments were received.

Burden Statement

The annual public reporting and record keeping burden for this collection of information is estimated to average 1.9 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Facilities burning hospital waste and/or medical infectious waste.

Estimated Number of Respondents: 6.
Frequency of Response: On occasion, semi-annual, and initial (one-time).

Estimated Total Annual Hour Burden: 4541 hours.

Estimated Total Annualized Capital, O&M Cost Burden: \$19618.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection

techniques to the addresses listed above. Please refer to EPA ICR No.1730.03 and OMB Control No. 2060-0363 in any correspondence.

Dated: September 20, 2001.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564-7167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated May 18, 2001 (97 FR 27647).

Draft EISs

ERP No. D-AFS-J65347-MT Rating EC2, Gold/Boulder/Sullivan (GBS), Implementation of Timber Harvest and Associated Activities and Rexford Ranger District, Lincoln County, MT.

Summary: EPA expressed environmental concerns about proposed riparian timber harvests with modification of INFISH RHCA guidelines, harvests in the MA-2 semi-primitive non-motorized recreation area, open road density levels exceeding Forest standards, and regeneration harvests in older forest habitat. EPA recommended that additional analysis be conducted to modify the preferred alternative to optimize environmental and resources trade-offs, and to include monitoring to detect effects on water quality.

ERP No. D-AFS-J65348-CO Rating EC2, Bark Beetle Analysis, Proposal to Reduce Infestation of Trees by Tree-Killing Bark Beetles, Medicine Bow-Routt National Forests, Hahans Peak/Bears Ears Ranger District, Routt, Grand, Jackson and Moffat Counties, CO.

Summary: EPA generally supports beetle suppression activities; however, EPA expressed environmental concerns with potential adverse impacts from thinning and associated road construction. Additional analysis and a description of the proposed adaptive management plan should be considered and included in the FEIS.

ERP No. D-AFS-K65234-CA Rating EC2, Mineral Forest Recovery Project, Proposes to Construct Defensible Fuel Profile Zones (DFPZs), Lassen National Forest, Almanor Ranger District, Tehama County, CA.

Summary: EPA raised concerns related to purpose and need, alternative development, road construction and decommissioning, and analysis of
