

clinics and improve accessibility to primary and preventative care services.

This study will examine how Ryan White-funded clinics are integrating the provision of primary and preventative care services to the overall HIV care model. Specifically, it will look at the protocols and strategies used by clinics to manage care for PLWH, specifically care coordination, referral systems, and patient-centered strategies to keep PLWH in care.

Need and Proposed Use of the Information: The proposed study will provide the HRSA HIV/AIDS Bureau (HAB) and policymakers with a better understanding of how the Ryan White Program currently provides primary and preventative care to PLWH. The first online survey will be targeted to clinic directors from a sample of about 160 Ryan White-funded clinics and will collect data on care models used; primary care services, including preventative services; and coordination of care. Data collected from this survey will provide a general overview of the various HIV care models used as well as insight to possible facilitators and barriers to providing primary and preventative care services. More in-depth data collection will be conducted with a smaller number of 30 clinics

representing clinic type (publicly funded community health organization, other community-based organization, health department, and hospital or university-based) and size. There will be three data collection instruments used: (1) An online survey completed by three clinicians at each of the clinics (clinician survey); (2) a data extraction of select primary and preventative care services; and (3) a telephone interview with the medical director. The clinician survey will provide a more in-depth look at the clinic protocols and strategies and how they are being used and implemented by the clinicians. The data extraction will provide quantitative information on the provision of select primary and preventative care services within a certain time period. With these data, the study team can assess the accuracy of information provided in the online surveys on the provision of care as well as the frequency at which primary and preventative care screenings are provided. Lastly, the interviews with the medical director will allow the study team to follow-up on the results of the clinician survey and data extraction and collect qualitative data and more in-depth details on the provision of primary and

preventative care services from a clinic wide perspective, specifically any facilitators and barriers.

These data will provide HAB the background to make informed policies and changes to the Ryan White Program in this new era when the well-being of PLWH demands a more complex and long-term HIV care model.

Likely Respondents: Clinics funded by the Ryan White Program.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Clinic Director of Online Survey	130	1	130	1	130
Clinician Online Survey	30	1	30	1	30
Data Extraction	30	1	30	3	90
Medical Director Interview	30	1	30	1	30
Total	220	220	6	280

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Office of Global Affairs Stakeholder Listening Session in Preparation for the 68th World Health Assembly

Time and date: May 8, 2015, 10:30–12:00 p.m. EST.

Place: Room 705A, U.S. Department of Health & Human Services, 200 Independence Ave SW., Washington, DC, 20201.

Status: Open, but requiring RSVP to OGA.RSVP@hhs.gov.

Purpose: The Stakeholder Listening Session will help the HHS Office of Global Affairs prepare for the World Health Assembly by taking full advantage of the knowledge, ideas, feedback, and suggestions from all communities interested in and affected

by agenda items to be discussed at the 68th World Health Assembly. Your input will contribute to U.S. positions as we negotiate these important health topics with our international colleagues.

The listening session will be organized around the interests and perspectives of stakeholder communities, including, but not limited to:

- Public health and advocacy groups;
- State, local, and Tribal groups;
- Private industry;
- Minority health organizations; and
- Academic and scientific organizations.

It will allow public comment on all agenda items to be discussed at the 68th World Health Assembly: http://apps.who.int/gb/ebwha/pdf_files/WHA68/A68_1-en.pdf

RSVP: Due to security restrictions for entry into the HHS Humphrey Federal Building, we will need to receive RSVPs for this event. Please send your full name and organization to OGA.RSVP@hhs.gov. If you are *not* a U.S. citizen, please note this in the subject line of your RSVP, and our office will contact you to gain additional biographical information for your clearance. If you are not a U.S. citizen, you must RSVP no later than April 23, 2015. If you are American, please RSVP no later than Friday, May 1, 2015.

Due to the number of stakeholders expected to attend in person, we request that all speakers keep their interventions to three minutes or less. This time limit will be strictly enforced. Written comments are welcomed and encouraged, even if you are planning to attend in person. Please send these to the same email address: OGA.RSVP@hhs.gov.

We look forward to hearing your comments relative to the 68th World Health Assembly agenda items.

Dated: March 30, 2015.

Jimmy Kolker,

Assistant Secretary for Global Affairs.
