

is to prepare and issue State and national estimates of crop and livestock production, prices, and disposition as well as economic statistics, farm numbers, land values, on-farm pesticide usage, pest crop management practices, as well as the Census of Agriculture. Livestock slaughter data are used to estimate U.S. red meat production and reconcile inventory estimates which provide producers and the rest of the industry with current and future information on market supplies. This data is also used in preparing production, disposition, and income statistics which facilitate more orderly production, marketing, and processing of livestock and livestock products. NASS compiles data from both Federally Inspected and Non-Federally Inspected Slaughter Plants.

Authority: These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995 Public Law 104–13 (44 U.S.C. 3501, *et seq.*) and Office of Management and Budget regulations at 5 CFR part 1320. NASS also complies with OMB Implementation Guidance, “Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA),” **Federal Register**, Vol. 72, No. 115, June 15, 2007, p. 33362.

Estimate of Burden: The Livestock Slaughter Survey includes a weekly survey of approximately 900 Federally Inspected (FI) slaughter plants and a monthly survey of approximately 1,100 State Inspected (SI) slaughter plants. Slaughter data is compiled by the Federal and State inspectors, therefore NASS does not contact these operations. NASS collects data only from the smaller independent plants and combines this data with the FI and SI data to create a national report. The smaller, independent operations (approximately 1,000 operations) are contacted either monthly, quarterly, or annually. Public reporting burden for this collection of information is estimated to average 15 minutes per response for an estimated annual burden of 1,800 hours. (The USDA and State inspectors are not included in the calculation of total burden, since they are performing this task as a part of their job functions.)

Respondents: Farmers and custom/state inspected slaughter plants.

Estimated Number of Respondents: 1,000.

Estimated Total Annual Burden on Respondents: 1,800 hours.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, April 23, 2020.

Kevin L. Barnes,

Associate Administrator.
