Designation of Dredged Material Disposal Sites in Rhode Island Sound and Adjacent Waters, Rhode Island and Massachusetts. Intent To Prepare an Environmental Impact Statement

AGENCIES: U.S. Environmental Protection Agency (EPA)—Region I, New England in cooperation with the U.S. Army Corps of Engineers (Corps), New England District.

ACTION: Notice of Intent to prepare an Environmental Impact Statement (EIS) to consider the potential designation of one or more long term dredged material disposal sites in the region of Rhode Island Sound under section 102(c) of the Marine Protection, Research and Sanctuaries Act. The EIS will provide an evaluation of the proposed disposal sites in Rhode Island Sound, known as Site 69B, 69A, Site 18, as well as additional alternatives including other possible open water disposal sites in this and adjacent waters, other types of dredged material disposal and management, and the no action alternative.

PURPOSE: In accordance with EPA's Notice of Policy and Procedures for Voluntary Preparation of National Environmental Policy Act documents (FR 63(209): 38045-38047), EPA issues this Notice of Intent to prepare an EIS for the evaluation of Designation of Long Term Dredged Material Disposal Sites in the Rhode Island Sound region, offshore of Rhode Island and Massachusetts.

FOR FURTHER INFORMATION CONTACT: Mr. Larry Rosenberg, Public Affairs Office, U.S. Army Corps of Engineers, 696 Virginia Road, Concord, MA 01742-2751, (978) 318-8657 email: larry.b.rosenberg@usace.army.mil or Ms. Ann Rodney, U.S. EPA—New England Region, One Congress Street, Suite 1100, CWQ Boston, MA 02114-2023, (617) 918-1538, rodney.ann@epa.gov. Please contact Ann Rodney should you have special needs (sign language interpreters, access needs) at the above address or our TDY# (617) 918-1189.

SUMMARY: There are many harbors, channels and navigation dependant facilities in Rhode Island and southeastern Massachusetts that must undergo periodic maintenance dredging to ensure safe navigation. Some harbors occasionally must be deepened beyond historical depths to meet changing economic and safety needs. Many of these necessary public and private

dredging projects have not been accomplished due to the unavailability of disposal sites for dredged material. In other cases, sites on land have been used and the agency or permit applicant had no alternative but to transport the dredged material outside of the project area, which can often increase the cost of the project substantially. Prior studies directed at resolving the dredged material disposal management problem in this area were limited in scope, addressing only the immediate disposal needs of a project pending at the time. EPA issued a Notice of Intent on a similar action in July 1984. Although that study identified the need for a dredged material site in the Rhode Island/southeast Massachusetts area, local opposition at the time halted the project early in its planning stage.

Historically, only one site in Rhode Island Sound has been extensively used. Dredged material was disposed at a site near Brenton Reef pursuant to an EIS released by the Corps in 1971 for the Providence River Dredging project. Another site in the Sound near Brown's Ledge was proposed and evaluated for the Fall River Improvement Dredging project in 1980, but never used. In 1998, the Corps issued a Draft EIS for the Providence River Maintenance Dredging project that evaluated three sites in Rhode Island Sound: Site 69A, 69 B and Site 18. A final EIS is due in June 2001. If the Providence EIS results in the selection of an ocean site by the Corps, the site may be used only for a 5-10 year period after the site has been selected for the Providence River Maintenance Dredging Project. Designation of a site for long term use must be performed under a separate designation process administered by EPA. The State of Rhode Island is currently in the process of identifying potential sites in Narragansett Bay for use by private marinas in the Bay area. Even if the state effort is successful, it is anticipated that there is need for a larger regional disposal site for bigger projects. Over the last two decades, a number of studies have confirmed the need for a regional site including two needs studies performed for each state in the late 1980's and a Rhode Island Governor directed task force (1993) and Rhode Island commission (1996). In response to recent requests of Governor Almond and Senator Reed, EPA and the Corps will consider designation of a long term disposal site in Rhode Island Sound and adjacent waters under section 102(c) of the MPRSA in a forthcoming EIS. The EIS will evaluate other possible alternatives including other open water disposal sites, other
