

region. ASPAs in this region are generally accessed via helicopter, thus a helicopter pilot and helicopter technician would accompany the operations personnel. No structures or scientific equipment would be erected within the ASPAs except as specified in separate science project specific ACA permits. All visits would be conducted in accordance with the management plan for each specific site.

*Location:* ASPA 121—Cape Royds, Ross Island; ASPA 124—Cape Crozier, Ross Island; ASPA 131—Canada Glacier, Lake Fryxell, Taylor Valley, Victoria Land; ASPA 137—North-West White Island, McMurdo Sound; ASPA 138—Linnaeus Terrace, Asgard Range, Victoria Land; ASPA 172—Lower Taylor Glacier and Blood Falls, Taylor Valley, McMurdo Dry Valleys, Victoria Land; ASPA 175—High Altitude Geothermal sites of the Ross Sea Region.

*Dates of Permitted Activities:* February 1, 2023–January 31, 2028.

*Permit Application:* 2023–034

9. *Applicant:* Michael Raabe, Leidos Innovations Group, Antarctic Support Contract, 7400 S Tucson Way, Centennial, CO. *environmental@usap.gov*.

*Activity for Which Permit is Requested:* Enter Antarctic Specially Protected Area. The applicant seeks an ACA permit for the purposes of entering Antarctic Specially Protected Areas (ASPAs) to support National Science Foundation (NSF) environmental management responsibilities under Annex V of the Protocol on Environmental Protection to the Antarctic Treaty. A review of Antarctic Specially Protected Area (ASPAs) management plans must be initiated at least every five years to; gather up to date information on site status; verify that the reasons for special protection remain valid; verify that the values being protected are being maintained; verify that the management measures in place are sufficient to provide protection; and recommend and management measures that may be necessary to maintain the values being protected. Antarctic Support Contract Environmental Engineering personnel would enter the listed ASPAs to collect information in support of 5-year ASPA management plan reviews, for general management and maintenance concerns, and to address any environmental concern or potential release within the ASPA. All visits would be conducted in accordance with the management plan for each specific site.

*Location:* ASPA 105—Beaufort Island, McMurdo Sound, Ross Sea; ASPA 106—

Cape Hallett, Northern Victoria Land, Ross Sea; ASPA 113—Litchfield Island, Arthur Harbor, Anvers Island, Palmer Archipelago; ASPA 121—Cape Royds, Ross Island; ASPA 123—Barwick and Balham Valleys, Southern Victoria Land; ASPA 124—Cape Crozier, Ross Island; ASPA 128—Western Shore of Admiralty Bay, King George Island, South Shetland Islands; ASPA 131—Canada Glacier, Lake Fryxell, Taylor Valley, Victoria Land; ASPA 137—North-West White Island, McMurdo Sound; ASPA 138—Linnaeus Terrace, Asgard Range, Victoria Land; ASPA 139—Biscoe Point, Anvers Island, Palmer Archipelago; ASPA 149—Cape Shirreff and San Telmo Island, Livingston Island, South Shetland Islands; ASPA 154—Botany Bay, Cape Geology, Victoria Island; ASPA 172—Lower Taylor Glacier and Blood Falls, Taylor Valley, McMurdo Dry Valleys, Victoria Land; ASPA 175—High Altitude Geothermal sites of the Ross Sea Region; ASPA 176—Rosenthal Islands, Anvers Island, Palmer Archipelago.

*Dates of Permitted Activities:* February 1, 2023–January 31, 2028.

## **NUCLEAR REGULATORY COMMISSION**

### **Licensing Support Network Advisory Review Panel**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of renewal of the charter of the Licensing Support Network Advisory Review Panel.

**SUMMARY:** The Licensing Support System Advisory Review Panel was established by the U.S. Nuclear Regulatory Commission (NRC) as a Federal Advisory Committee in 1989. Its purpose was to provide advice on the fundamental issues of design and development of an electronic information management system to be used to store and retrieve documents relating to the licensing of a geologic repository for the disposal of high-level radioactive waste, and on the operation and maintenance of the system. This electronic information management system was known as the Licensing Support System.

**FOR FURTHER INFORMATION CONTACT:** Russell E. Chazell, Office of the Secretary, U.S. Nuclear Regulatory

Commission, Washington, DC 20555; telephone: (301) 415–7469 or at *Russell.Chazell@nrc.gov*.

**SUPPLEMENTARY INFORMATION:** In November 1998, the Commission approved amendments to title 10 *Code of Federal Regulations* part 2 that renamed the Licensing Support System Advisory Review Panel as the Licensing Support Network Advisory Review Panel (LSNARP). The Licensing Support Network (LSN) was shut down in 2011 and the document collection was submitted to the Office of the Secretary. The document collection was made publicly available in the NRC's Agencywide Documents Access and Management System in August 2016 and contains over 3.69 million documents associated the proposed high-level waste facility at Yucca Mountain. Membership on the Panel will continue to be drawn from those whose interests could be affected by the use of the LSN document collection, including the Department of Energy, the NRC, the State of Nevada, the National Congress of American Indians, affected units of local governments in Nevada, the Nevada Nuclear Waste Task Force, and nuclear industry groups. Federal agencies with expertise and experience in electronic information management systems may also participate on the Panel.

The NRC has determined that renewal of the charter for the LSNARP until December 16, 2024, is in the public interest in connection with duties imposed on the Commission by law. This action is being taken in accordance with the Federal Advisory Committee Act after consultation with the Committee Management Secretariat, General Services Administration.

Dated at Rockville, Maryland this 16th day of December, 2022.

For the U.S. Nuclear Regulatory Commission.

**Russell E. Chazell,**  
Federal Advisory Committee Management Officer, Office of the Secretary.
