BILLING CODE 6718-04-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 20

[WT Docket No. 94-102]

Wireless E911 Compatibility, Public Safety Answering Points; Correction

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; correction.

SUMMARY: The Commission published a document in the **Federal Register** of July 16, 2001. The Commission now corrects the date for reply comments reflected in that document which sought comment on a petition for clarification and/or a declaratory ruling concerning the process by which a Public Safety Answering Point ("PSAP") makes a valid request for Phase II enhanced 911 ("E911") service from a wireless carrier as provided for in the Commission's rules.

DATES: Reply comments for the proposed rule (66 FR 36989) are due August 1, 2001.

FOR FURTHER INFORMATION CONTACT: Patrick Forster, 202-418-1310.

SUPPLEMENTARY INFORMATION: The Federal Communications Commission published a document seeking comment on a petition for clarification and/or a

declaratory ruling regarding E911 Phase II procedures. In the FR Doc. 01-17785 (66 FR 36989, July 16, 2001) in column 3, correct the **DATES** caption to read as follows:

DATES: Comments are due on or before July 25, 2001, and reply comments are due on or before August 1, 2001.

Federal Communications Commission.

Kris Monteith,

Chief, Policy Division, Wireless Telecommunications Bureau.

[FR Doc. 01-18836 Filed 7-26-01; 8:45 am]

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01-1670, MM Docket Nos. 01-155, 01-156, 01-157, 01-158; RM-10176, RM-10177, RM-10178, RM-10179]

Radio Broadcasting Services; Goliad, Paducah, and Woodson, TX; Paulden, AZ

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comment on four petitions for rulemaking. Three filed by Charles Crawford propose the allotments of Channel 282A at Goliad, Texas, Channel 296C3 at Paducah, Texas, and Channel 298A at Woodson, Texas. Channel 282A can be allotted at Goliad in compliance with the Commission's minimum distance separation requirements, with respect to domestic allotments, 4.6 kilometers (2.9 miles) north of the community at coordinates 28-42-35 NL and 97-23-02 WL. Channel 296C3 can

be allotted at Paducah in compliance with the Commission's minimum distance separation requirements, with respect to domestic allotments, 0.4 kilometers (0.3 miles) northwest of the community, at coordinates 34-00-59 NL and 100-18-35 WL. Channel 298A can be allotted at Woodson in compliance with the Commission's minimum distance separation requirements, with respect to domestic allotments, at a site 1.9 kilometers (1.2 miles) southwest of the community at coordinates 33-00-32 NL and 99-04-23 WL. The fourth, filed by Paulden Broadcasting, proposes the allotment of Channel 263C3 at Paulden, Arizona. Channel 263C3 can be allotted at Paulden in compliance with the Commission's minimum distance separation requirements, with respect to domestic allotments without a site restriction at coordinates 34-53-00 NL and 112-28-00 WL. Since the Goliad and Paulden proposals are within 320 kilometers (199 miles) of the U.S.-Mexico border, concurrence of the Mexican government to those proposed allotments will be required.

ADDRESSES: Federal Communications Commission, 445 Twelfth Street, SW., Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, as follows:

DATES: Comments must be filed on or before September 4, 2001, and reply comments must be filed on or before September 18, 2001.

FOR FURTHER INFORMATION CONTACT: Victoria M. McCauley, Mass Media Bureau, (202) 418-2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket Nos. 01-155, 01-156, 01-157, and 01-158,

adopted July 11, 2001, and released July 13, 2001. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 445 12th Street, SW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857-3800, 1231 20th Street, NW., Washington, DC 20036.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Part 73 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 73—RADIO BROADCAST SERVICES

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334 and 336.

§ 73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments under Texas is amended to add Channel 282A at Goliad, Paducah, Channel 296C3, and Woodson, Channel 298A.

3. Section 73.202(b), the Table of FM Allotments under Arizona, is amended to add Paulden, Channel 263C3.

Federal Communications Commission.

John A. Karousos,

Chief, Allocations Branch, Policy and Rules Division, Mass Media Bureau.

BILLING CODE 6712-01-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 600

[I.D. 071601B]

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permit (EFP)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of a proposal for an EFP to conduct experimental fishing; request for comments.

SUMMARY: The Administrator, Northeast Region, NMFS (Regional Administrator) has made a preliminary determination that an application for an EFP contains

all of the required information and warrants further consideration. The Regional Administrator has also made a preliminary determination that the activities authorized under the EFP would be consistent with the goals and objectives of the Northeast Multispecies Fishery Management Plan (FMP), and that the cumulative impacts would be within the scope of earlier analyses on the FMP. However, further review and consultation may be necessary before a final determination is made to issue an EFP. Therefore, NMFS announces that the Regional Administrator proposes to issue an EFP in response to the application that would allow for exemptions of net mesh size and Days-at-Sea (DAS) requirements of the FMP in order to compare the selectivity of a standard commercial trawl net with that of a trawl net with a finfish excluder device. The objective is to develop a trawl with a reduced bycatch of regulated multispecies.

DATES: Comments must be received on or before August 13, 2001.

ADDRESSES: Written comments should be sent to Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Regional Office, 1 Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on EFP Proposal." Comments may also be sent via facsimile (fax) to (978) 281-9135.

FOR FURTHER INFORMATION CONTACT:

Walter J. Gardiner, Fishery Management Specialist, (978) 281-9326.

SUPPLEMENTARY INFORMATION: The University of New Hampshire (UNH) submitted an application for an EFP on June 1, 2001. The EFP would allow the applicant to perform gear research in order to develop a trawl design that would reduce the bycatch of regulated multispecies, particularly Atlantic cod and juvenile flatfish.

This proposal builds upon previous research and intends to develop flatfish trawl designs based upon the different catch selectivities of gear for flatfish and roundfish (as a result of their different body shapes and behaviors) A component of the experiment will include video recording of the gear performance under tow to assess gear interactions with fish and habitat.

The experiment would occur within a portion of the Gulf of Maine/Georges Bank Regulated Mesh Area (GOM/GB RMA), well within the Northern Shrimp Small Mesh Exemption Area -- specifically, the Bank Comfort area and the Jordan Basin, which is approximately north of 43°40' N. lat. and between 67°30' and 68°30' W. long. The experimental fishing area would not include any closed areas during the

time of the research (August 15 through October 15, 2001).

The experiment proposes to compare the following two trawl net configurations: (1) Standard diamond and square codend mesh sizes, which will be the control; and (2) standard net with two grated grid finfish excluder devices. The first grate is angled at 25 degrees and has horizontal bar spacings of 50 mm or 2 inches; the second grate, angled at 65 degrees, has vertical bar spacings of 90 mm or 3.5 inches and is designed to allow for the escape of Atlantic cod. Both grated grids will be covered with a small mesh bag to determine the effectiveness of the bycatch reduction devices.

The project would last for 2 years. Project participants would: (1) Design a double grid system based on differences in the behavior and shape between roundfish and flatfish; (2) test the design in a flume tank to verify design specifications and operational parameters; (3) build a prototype net with the selectivity device and test it in the sea using the standard (commercial) flatfish trawl as a control; (4) after the first year of sea trials, modify the grid based on the results; and (5) organize a Northwest Atlantic groundfish selectivity workshop to communicate the results from this project.

The sea trials would require between 152 and 168 hours of towing during the testing phase of the initial gear: 7 days of towing with two or three 2-hour tows per day per trip (four trips total). Projected landings from the trawls are expected to be 400 to 500 lb (181.44 to 226.8 kg) per day of Atlantic cod, flounder, monkfish, hake, pollock, and haddock combined; the total catch is estimated to be between 11,000 lb. (4,989.5 kg) and 14,000 lb. (6350.3 kg). These catch levels are approximately the same as the possession/landing limits for vessels fishing within the GOM/GB RMA. Thus, the experimental gear trials are expected to have very little incremental impact on the fishery resources. The vessel would be allowed to retain Atlantic cod, flounder, haddock, monkfish, hake, and pollock for commercial sale, up to the applicable Federal landing limits during the sea trial testing phase.

During the sea trial trips, UNH would have an observer on board and the catch (retained in the external bag and codend) would be measured according to standard fish sampling methodology and recorded for use by UNH personnel. Any sub-legal sized fish would be processed by the UNH observer (e.g., measured) and returned immediately to the water.
