Proposed Project

Airline and Vessel and Traveler Information Collection (42 CFR part 71.4(d)) (OMB Control No. 0920–1354, Exp. 5/31/2022)—Extension—National Center for Emerging Zoonotic and Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC), a component of the Department of Health and Human Services (HHS), has the regulatory authority to collect contact information from airlines under 42 CFR 71. CDC exercises this authority to ensure that public health agencies across the United States can provide appropriate public health follow-up to travelers who may be ill or exposed to a communicable disease.

CDC announces the requirement for all airlines and operators to collect and/or maintain passenger and crew contact information (designated information), and for passengers to provide such

information to airlines and operators, on flights arriving into the United States. This includes flights with intermediate stops in the United States between the flight's foreign point of origin and the final destination. Unless otherwise transmitted to the U.S. Government via established U.S. Department of

Homeland Security (DHS) data systems, airlines and operators are required to retain the designated information for 30 days and transmit it within 24 hours of a request from CDC. Accurate and complete contact information is needed to protect the health of travelers and

U.S. communities and for the purposes of public health follow-up.

CDC seeks an Extension for Airline and Vessel and Traveler Information Collection (42 CFR part 71.4(d)) (OMB Control No. 0920-1354) and requests approval for an estimated 6,191,023 burden hours.
