Fisheries of the Exclusive Economic Zone Off Alaska; Skates Management in the Groundfish Fisheries of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: The North Pacific Fishery Management Council (Council) has submitted Amendment 63 to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP). If approved, Amendment 63 would move skates from the "other species" list to the "target species" list in the FMP. By listing skates as a target species, a directed fishery for skates in the Gulf of Alaska (GOA) may be managed to reduce the potential for overfishing skates. This action is intended to promote the goals

and objectives of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the FMP, and other applicable laws. Comments from the public are welcome.

DATES: Comments on Amendment 63 must be submitted by February 2, 2004.

ADDRESSES: Comments on the FMP amendment should be sent to Sue Salvesson, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802, Attn: Lori Durall, or delivered to room 420 of the Federal Building, 709 West 9th Street, Juneau, AK. Comments also may be sent via facsimile (fax) to 907-586-7557. Comments will not be accepted if submitted via e-mail or Internet. Copies of Amendment 63 and the Environmental Assessment/Regulatory Impact Review/Initial Regulatory Flexibility Analysis (EA/RIR/IRFA) for the amendment may be obtained from the same address.

FOR FURTHER INFORMATION CONTACT:

Melanie Brown, 907-586-7228 or melanie.brown@noaa.gov.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Act requires that each Regional Fishery Management Council submit any FMP amendment it prepares to NMFS for review and approval, disapproval, or partial approval. The Magnuson-Stevens Act also requires that NMFS, upon receiving an FMP amendment, immediately publish a notice in the **Federal Register** that the amendment is available for public review and comment.

The Council unanimously adopted Amendment 63 in October 2003. If approved by NMFS, this amendment would move skates from the "other species" list to the "target species" list, allowing the management of skates as a target species. NMFS trawl survey and catch information show that of the 14 skate species occurring in the Gulf of Alaska, the majority of the catch is made up of big and longnose skate species. The big skates and longnose skates would be listed under the skates category in the target species list to allow for management of these individual species.

Skates currently are managed as part of the other species complex with sharks, sculpins, octopus, and squid. The total allowable catch limit (TAC) for this complex is five percent of the aggregate of all TACs for target groundfish species or species groups of the GOA. Target species TACs are established for an individual species or species group, and NMFS manages the directed fishery for these species to avoid exceeding the specified TACs.
