

Section 402(p)(3)(B)(iii) of CWA also authorizes EPA to include in an MS4 permit “such other provisions as [EPA] determine[s] appropriate for control of . . . pollutants.” This provision forms a basis for imposing water quality-based effluent limitations (WQBELs), consistent with the authority in Section 301(b)(1)(C) of the CWA. See *Defenders of Wildlife v. Browner*, 191 F.3d 1159, 1166–67 (9th Cir. 1999); 64 FR 68722, 68753, 68788 (Dec. 8, 1999). Accordingly, the draft permit contains the water quality-based effluent limitations, expressed in terms of BMPs, which EPA has determined are necessary and appropriate under the CWA.

EPA issued a final general permit to address stormwater discharges from small MS4s on November 6, 2006. The 2006 general permit required small MS4s to develop and implement a SWMP designed to control pollutants to the maximum extent practicable and protect water quality. This draft permit builds on the requirements of the previous general permit.

EPA views the MEP standard in the CWA as an iterative process. MEP should continually adapt to current conditions and BMP effectiveness. Compliance with the requirements of this general permit will meet the MEP standard. The iterative process of MEP consists of a municipality developing a program consistent with specific permit requirements, implementing the program, evaluating the effectiveness of the BMPs included as part of the program, then revising those parts of the program that are not effective at controlling pollutants, then implementing the revisions, and evaluating again. The changes contained in the draft general permit reflect the iterative process of MEP. Accordingly, the draft general permit contains more specific tasks and details than the 2006 general permit.

EPA has explained in the draft general permit fact sheet a summary of permit conditions. The draft general permit and fact sheet are available at EPA’s Web site: www.epa.gov/region02/water/permits.html.

Other Legal Requirements

A. Endangered Species Act (ESA)

The provisions related to the ESA have been enhanced from those in the 2006 draft permit. EPA will be requesting concurrence from the appropriate Federal services (U.S. Fish and Wildlife Service and National Marine Fisheries Service) in connection with the 2014 draft and has renewed this request for the new Draft Permit.

B. Executive Order 12866

EPA has determined that this general permit is not a “significant regulatory action” under the terms of Executive Order 12866 and is therefore not subject to OMB review.

C. Paperwork Reduction Act

The information collection requirements of this permit were previously approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq., and assigned OMB control number 2040–0004.

D. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA), 5 U.S.C. 601 et seq., requires that EPA prepare a regulatory flexibility analysis for rules subject to the requirements of 5 U.S.C. 553(b) that have a significant impact on a substantial number of small entities. However, general NPDES permits are not “rules” subject to the requirements of 5 U.S.C. 553(b) and are therefore not subject to the RFA.

E. Unfunded Mandates Reform Act

Section 201 of the Unfunded Mandates Reform Act (UMRA), Public Law 104–4, generally requires Federal agencies to assess the effects of their “regulatory actions” (defined to be the same as “rules” subject to the RFA) on tribal, state, and local governments and the private sector. However, general NPDES permits are not “rules” subject to the requirements of 5 U.S.C. 553(b) and are therefore not subject to the RFA or the UMRA.

Authority: This action is being taken under the Clean Water Act, 33 U.S.C. 1251 et seq.
