SUPPLEMENTARY INFORMATION:

- I. Background
- II. Current Actions
- III. Request for Comments

I. Background

The Federal Energy Administration Act of 1974 (Pub. L. 93–275, 15 U.S.C. 761 et seq.) and the Department of Energy Organization Act (Pub. L. 95–91, 42 U.S.C. 7101 et seq.) require the EIA to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35), provides the general public and other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Any comments received help the EIA to prepare data requests that maximize the utility of the information collected, and to assess the impact of collection requirements on the public. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) of the collections under section 3507(h) of the Paperwork Reduction Act of 1995.

Appendix C, Form NWPA–830, ‘Delivery Commitment Schedule, (DCS)’ is designed to allow companies purchasing nuclear waste disposal services from the DOE to identify the number of assemblies, including their initial uranium loading, the range of discharge dates, and the mode of transportation, along with the year that the purchaser proposes that the DOE take delivery. This information is required at a point in time at least 63 months before expected transfer to the DOE. The DCS provides purchasers with the opportunity to inform DOE of their plans for utilizing their allocations of projected Federal Waste Management
