POSTAL SERVICE

39 CFR Part 111

New Standards for First-Class Mail and Priority Mail Services

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service will adopt new mailing standards and prices on May 14, 2007, to support most of the pricing change recommended by the Postal Regulatory Commission and approved by the Governors of the United States Postal Service. After a reconsideration by the Postal Regulatory Commission, we are lowering the price for the Priority Mail flat-rate box to \$8.95 from the previously recommended \$9.15, and extending the \$0.17

nonmachinable surcharge to all nonmachinable single-piece and presorted First-Class Mail letters, regardless of weight.

EFFECTIVE DATE: 12:01 a.m. on May 14, 2007.

FOR FURTHER INFORMATION CONTACT: Joel Walker, 202–268–7261.

SUPPLEMENTARY INFORMATION: The Postal Service's request in Docket No. R2006–1 included mail classification changes, new pricing structures, and price changes for most domestic mailing services. This final rule provides new revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM) that we will adopt to implement two items that were reconsidered in the R2006–1 pricing change.

You can find more information about the pricing change at <http://www.usps.com/ratecase>, including our proposed and final rules for all of the rate and classification changes. Our Web site provides frequently asked questions, press releases, and *Mailers Companion* and *MailPro* articles for business mailers. We also posted a new version of the DMM with all of the prices and standards effective May 14, including the reconsidered prices in this final rule. We encourage you to use these materials as you prepare for the pricing change.

Background

The Postal Service Board of Governors set May 14, 2007, as the implementation date for new prices and related changes for all classes of mail and extra services, with the exception of Periodicals mail, which we will implement on July 15, 2007. While the Governors acted to implement all of the Postal Regulatory Commission's recommended rates, they also asked the Commission to reconsider three issues: the prices for Standard Mail flats, the application of the nonmachinable surcharge for First-Class Mail letters, and the price for the Priority Mail flat-rate box.

On April 27, 2007, the Commission issued its Opinion and Recommended Decision on Reconsideration regarding the nonmachinable surcharge for First-Class Mail letters and the price for the Priority Mail flat-rate box. The Commission recommended that we remove the “1-ounce or less” limitation on the nonmachinable surcharge for First-Class Mail letters, and charge \$8.95 for the Priority Mail flat-rate box. The Postal Service Board of Governors approved the recommended changes and set May 14, 2007, as the effective date.

Summary of First-Class Mail Changes

Letter-rate First-Class Mail pieces with any of the nonmachinable characteristics in DMM 201.2.1 are subject to a \$0.17 nonmachinable surcharge. Originally the Commission recommended the surcharge only for pieces weighing 1 ounce or less.

Summary of Priority Mail Changes

The USPS-produced flat-rate box is charged \$8.95, not \$9.15 as the Commission originally recommended.

We adopt the following amendments to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

RIN 2025-AA12

Dioxin and Dioxin-like Compounds; Toxic Equivalency Information; Community Right-To-Know Toxic Chemical Release Reporting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Under section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA), EPA is finalizing revisions to the reporting requirements for the dioxin and dioxin-like compounds category. The current EPCRA section 313 regulations require facilities to report dioxin and dioxin-like compounds in units of total grams for the entire category, and provide a

single generic distribution of the individual dioxin and dioxin-like compounds at the facility. The final rule requires that, in addition to reporting total gram quantities for the category, facilities are required to report the mass quantity of each individual member of the category. The mass quantity data for the individual members of the category will be used by EPA to perform toxic equivalency (TEQ) computations which will be made available to the public. TEQs are a weighted quantity measure based on the toxicity of each member of the dioxin and dioxin-like compounds category relative to the most toxic members of the category, i.e., 2,3,7,8-tetrachlorodibenzo-p-dioxin and 1,2,3,7,8-pentachlorodibenzo-p-dioxin. The final rule also eliminates the reporting of the single generic distribution for the members of the dioxin and dioxin-like compounds category.

DATES: This final rule is effective on July 9, 2007.
