Office of the Secretary

Findings of Scientific Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Office of Research Integrity (ORI) and the Assistant Secretary for Health have taken final action in the following case:

Raghootama S. Pandurangi, Ph.D., University of Missouri—Columbia (UMo):

Based on the report of an investigation conducted by UMo and additional analysis conducted by ORI in its oversight review, the U.S. Public Health Service (PHS) found that Dr. Pandurangi, a former Research Assistant Professor at UMo, engaged in scientific misconduct by plagiarizing and falsifying research data taken from a journal article published by other scientists for use in supplementary materials of a research grant application submitted to the National Institutes of Health (NIH).

Specifically, PHS finds that Dr. Pandurangi plagiarized the images of data in Figures 2A and 2B and related text in supplemental material he submitted in connection with National Heart, Lung, and Blood Institute (NHLBI), NIH, grant application 1 R01 HL62517-01A2, Myocardial Viability by AII Receptor-99mTc Conjugates," in which he was the principal investigator. Specifically, Figures 2A and 2B and related text were plagiarized from Figures 7C and 7D of the following journal publication: Gibson, R., Beauchamp, H., Fioravanti, C., Brenner, N., and Burns, H.D. "Receptor Binding Radiotracers for the Angiotensin II Receptor: Radioiodinated [Sar¹, Ile⁸]Angiotensin II," Nuclear Medicine and Biology 21:593-600, 1994.

In addition, Dr. Pandurangi falsified the text in the supplement to his NIH grant application by claiming that Figures 2A and 2B represented a compound he had developed. Namely, he claimed that Figure 2A represented radioiodinated compound ¹²³I-2C and Figure 2B represented radioiodinated compound ¹²³I-2C with nonradioactive compound 2C added as a competitor. However, Figures 2A and 2B were plagiarized from the figures in the above Nuclear Medicine and Biology article, which in reality represented radiolabeled [Sar¹, Ile⁸]Angiotensin II, with compound L-158-809 as a blocker/competitor.

Dr. Pandurangi has entered into a Voluntary Exclusion Agreement (Agreement) with PHS in which he has voluntarily agreed:

(1) To exclude himself from any contracting or subcontracting with any agency of the United States Government and from eligibility for, or involvement in, nonprocurement transactions (e.g.,
