FDA is therefore withdrawing CPG 253.100, in its entirety, to eliminate the obsolete compliance policy.

SUPPLEMENTARY INFORMATION:

Standardization efforts concerning the clinical development of cellular therapies and regenerative medicine products have generated a great deal of interest. These efforts include standards development, expert opinion position papers, and professional practice guidelines. However, relatively little is done to coordinate the various existing efforts. In the public workshop, FDA hopes to bring together a broad range of stakeholders of cellular therapies and regenerative medicine products in order to:

- Inform stakeholders about the types of standards and standards organizations that are available currently, the role that the Federal Agencies play in standards development, and the potential role that stakeholders can play in standards development.
- Provide a high-level overview of current standards development activities in the fields of cellular therapy and regenerative medicine and the regulatory application of standards.
- Provide opportunity for discussion of areas of high interest for current or future standards development in the fields of cellular therapy and regenerative medicine and to explore ways to minimize redundancy and maximize collaboration.

We encourage all who have an interest in the development of cellular therapies and regenerative medicine products to attend the public workshop.

Transcripts: Please be advised that as soon as possible after a transcript of the public workshop is available, it will be accessible at: *http://www.fda.gov/BiologicsBloodVaccines/NewsEvents/WorkshopsMeetingsConferences/TranscriptsMinutes/default.htm.* Transcripts of the public workshop may also be requested in writing from the Division of Freedom of Information (ELEM–1029), Food and Drug Administration, 12420 Parklawn Dr., Element Bldg., Rockville, MD 20857.
