

authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information are estimated to average 37 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Commercial Ethylene Oxide Sterilization and Fumigation Operations.

Estimated Number of Respondents: 119.

Frequency of Response: Initially and semiannually.

Estimated Total Annual Hour Burden: 8,662.

Estimated Total Costs: \$1,195,959, which includes \$65,000 annualized Capital Startup Costs, \$583,000 annualized Operations & Maintenance (O&M) costs, and \$547,959 annualized labor costs.

Changes in the Estimates: There is no change in the labor hours or cost in this ICR other than a fractional labor hour adjustment to account for rounding-off in the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden.

Dated: April 9, 2007.

Title: Application for Experimental Use Permit to Ship and Use a Pesticide for Experimental Purposes Only.

ICR Status: This is a request to renew an existing approved collection. This ICR is scheduled to expire on May 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost.

Abstract: This information collection provides the EPA with the data necessary to determine whether to issue an experimental use permit (EUP) under section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. FIFRA requires that before a pesticide product may be distributed or sold in the U.S. it must be registered by EPA. However, section 5 authorizes EPA to issue experimental use permits which allow pesticide companies to temporarily ship pesticide products for experimental use for the purpose of gathering data necessary to support the application for registration

of a pesticide product. In general, EUP's are issued either for a pesticide not registered with the Agency or for a registered pesticide for a use not registered with the Agency. The permit applications are voluntarily submitted to the Agency, however applicants must submit the applicable information to be granted a permit.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average about 10 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Pesticide Registrants and other agricultural chemical manufacturing.

Estimated Number of Respondents: 75.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 757.

Estimated Total Annual Labor Cost: \$48,237.

Changes in the Estimates: There is no change of hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: April 6, 2007.

Acting Director, Collection Strategies Division.
