Food and Nutrition Service

Agency Information Collection Activities: Proposed Collection; Comment Request—Models of SNAP-Ed and Evaluation Study

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on the proposed collection of data for the Models of SNAP-Ed and Evaluation Study. This is a NEW information collection. The goal of Supplemental Nutrition Assistance Program Education (SNAP-Ed) is to improve the likelihood that SNAP participants and eligibles will make healthy choices within a limited budget and choose active lifestyles consistent with the current Dietary Guidelines for Americans and the USDA Food Guidance System. With limited resources, SNAP-Ed nutrition educators attempt to tailor their messages to fit the varying needs of differing populations and evaluate the extent to which their efforts result in positive, voluntary changes in nutrition behaviors.

The Models of SNAP-Ed and Evaluation Study will conduct rigorous, independent evaluations of four SNAP-Ed demonstration projects. Each of the demonstration projects will also conduct an impact evaluation assessment which will be compared to FNS's more rigorous, independent evaluation. The Models of SNAP-Ed and Evaluation Study will provide FNS with sound, independent estimates of the effectiveness of four SNAP-Ed approaches, and will provide SNAP-Ed educators with examples of evaluation designs that are both feasible and scientifically robust.

DATES: Written comments must be submitted on or before July 7, 2009.

ADDRESSES: Comments are invited on (a) Whether the proposed data collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of

the methodology and assumptions that were used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

SUPPLEMENTARY INFORMATION:

Title: Models of SNAP-Ed and Evaluation.

OMB Number: [not assigned].

Expiration Date: [not assigned].

Type of Request: New collection.

Abstract: The purposes of the Models of SNAP-Ed and Evaluation Study are to (1) demonstrate that nutrition education through SNAP can bring about meaningful behavioral change, and (2)

show that nutrition education implementers can mount meaningful intervention outcome evaluations.

In fiscal year 2009, four nutrition education interventions were selected to participate as demonstration projects for this study. The four demonstration projects that will be approved under their States' Annual SNAP-Ed Plan are:

The University of Nevada at Reno's "All 4 Kids" intervention in Head Start Childcare Centers. FNS will employ an experimental evaluation design through which pre and post-intervention assessments will be conducted at 12 Head Start Centers with 6 serving as treatment sites and 6 as controls. Parents will be asked to report on the eating behaviors of their children. Additionally, educators at treatment sites will be interviewed for their impressions of the effectiveness of the intervention and their recommendations for improvement.

The Chickasaw Nation Nutrition Service "Eagle Play" intervention, tailored for Native American children. The FNS evaluation will use a quasi-experimental design in which 6 Pontotoc County, Oklahoma elementary schools will be demographically matched to the 6 schools selected to take part in the intervention. Pre and post-intervention assessments will be conducted at both treatment and control schools. Parents will be surveyed about the fruit and vegetable consumption of their children. Educators at treatment sites will be interviewed for their impressions of the effectiveness of the intervention and their recommendations for improvement.

The Pennsylvania State University's "Eating Competencies" web-based nutrition education intervention for SNAP eligible women, ages 18-45. Using a randomized control design, FNS will monitor the impact of the intervention on fruit and vegetable consumption as reported by participants and control subjects. The Pennsylvania State University nutrition educators will be informally interviewed for their

impressions of the practicality of the intervention and their recommendations for improvement.

The New York State Department of Health's intervention, "Eat Well, Play Hard" in Child and Adult Care Food Program Centers. The quasi-experimental FNS evaluation will compare pre and post-intervention responses at 18 treatment and 18 control centers. Parents will be asked about the availability of fruits, vegetables and low-fat dairy at home, and their children's willingness to consume them. Educators and Dietitians at treatment sites will be interviewed for their impressions of the effectiveness of the intervention and their recommendations for improvement.
