SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing a revision to an existing guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

Revision 2 of Regulatory Guide 10.7, "Guide for the Preparation of Applications for Licenses for Laboratory and Industrial Use of Small Quantities of Byproduct Material," was issued with a temporary identification as Draft Regulatory Guide, DG-0017. This guide directs the reader to the type of information needed by the NRC staff to evaluate an application for a specific license for laboratories and industries to use megabecquerel (MBq) (millicurie (mCi)) quantities of byproduct material (reactor- or accelerator-produced radionuclides).

The regulatory framework that the NRC has established for laboratory and industrial use of small quantities of byproduct material is in Title 10, Part 30, "Rules of General Applicability to Domestic Licensing of Byproduct Material," of the *Code of Federal Regulations* (10 CFR part 30).

This regulatory guide endorses the methods and procedures for applying for a license for laboratory and industrial use of small quantities of byproduct material contained in the current revisions of NUREG-1556, Volume 7, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Academic, Research and Development, and Other Licenses of Limited Scope" and NUREG-1556, Volume 12, "Consolidated Guidance about Material Licenses: Program-Specific Guidance About Possession and Licenses for Manufacturing and Distribution," as a process that the NRC staff finds acceptable.

II. Further Information

In April 2008, DG-0017 was published with a public comment period of 60 days from the issuance of the guide. No comments were received and the public comment period closed on June 30, 2008. Revision 2 of Regulatory Guide 10.9, "Guide for the Preparation of Applications for the Use of Self-Contained Dry Source-Storage Gamma Irradiators," was issued with a temporary identification as Draft Regulatory Guide, DG-0019. This regulatory guide directs the reader to the type of information acceptable to the NRC staff for review of an application for the use of a self-contained dry source-storage gamma irradiator. Title 10, Part 36, "Licenses and Radiation Safety Requirements for Irradiators," of the *Code of Federal Regulations* (10 CFR Part 36) contains the licensing, design, and radiation safety requirements for irradiators. In addition, licensees and applicants may be subject to portions of the requirements in 10 CFR Part 30, "Rules of General Applicability to Domestic Licensing of Byproduct Material," and 10 CFR Part 20, "Standards for Protection Against Radiation."
