BILLING CODE 7545–01–P

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of Permit Applications Received under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by March 3, 2014. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Division of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Adrian Dahood, ACA Permit Officer, at the above address or ACApermits@nsf.gov or (703) 292–7149.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for

various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

Permit Application: 2014–029

1. *Applicant:* William Detrich, Dept. of Marine and Environmental Sciences, Northeastern University Marine Science Center.

Activity for Which Permit is Requested

ASPAs; A permit is requested to enter ASPA 152 (Western Bransfield Strait) and ASPA 153 (Eastern Dallmann Bay) using the ARSV Laurence M. Gould to capture Antarctic fish by trawling and trapping. The collected fish would be used to study the effects of a warming Southern Ocean on development of the embryos of Antarctic fishes. Data collected under this permit would be part of a long-term (28 year) dataset. Approximately 50 hours of trawling would be conducted in ASPA 152 and approximately 20 hours would be conducted in ASPA 153. Sixteen traps would be set and allowed to soak for a total of 3 days.

It is anticipated that that approximately 400 hundred individual fish representing four species of ice fish (*Notothenia coriiceps*, *Chaenocephalus aceratus*, *Champscephalus gunnari*, *Gobionotothen gibberifrons*) would be captured in the ASPAs and used in the study. Live fishes would be transported to the aquarium facilities at Palmer Station for experimentation. Breeding and biochemical experiments would be conducted. All experimental animals would be humanely euthanized and properly disposed of outside the ASPAs

Location

ASPAs 152 Western Bransfield Strait and ASPA 153 Eastern Dallmann Bay.

Dates

March 15, 2014 to May 19, 2014.

Nadene G. Kennedy,

Polar Coordination Specialist, Division of Polar Programs.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC–2013–0213]

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on September 30, 2013 (78 FR 59979).

1. *Type of submission, new, revision, or extension:* New.
2. *The title of the information collection:* Voluntary Reporting of Planned Licensing Request Submittals.
3. *Current OMB approval number:* 3150–XXXX.
4. *The form number if applicable:* N/A.
5. *How often the collection is required:* Annually.
6. *Who will be required or asked to report:* All operating power reactors whose licensing actions are handled by the Office of Nuclear Reactor Regulation, Division of Operating Reactor Licensing.
7. *An estimate of the number of annual responses:* 62.
8. *The estimated number of annual respondents:* 62.
9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 310.
10. *Abstract:* The NRC is seeking information on the licensing actions that licensees plan to submit over the next three years. The information would be used by the Office of Nuclear Reactor Regulation to better plan its resource utilization. Specifically, the office would use the information to (1) inform its budget development, (2) identify potential impacts from multiple actions utilizing the same resources, (3) develop solutions, if possible, to resource conflicts, and (4) communicate scheduling impacts to stakeholders.

The public may examine and have copied for a fee publicly available documents, including the final supporting statement, at the NRC's Public Document Room, Room O-1F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. The OMB clearance requests are available at the NRC's Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/>. The document will be available on the NRC's home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by March 3, 2014. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date.

Danielle Y. Jones, Desk Officer, Office of Information and Regulatory Affairs (3150-XXXX), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be emailed to Danielle_Y_Jones@omb.eop.gov or submitted by telephone at 202-395-1741.

The Acting NRC Clearance Officer is Kristen Benney, telephone: 301-415-6355.

Dated at Rockville, Maryland, this 27th day of January, 2014.

For the Nuclear Regulatory Commission.

Fajr Majeed,

Acting NRC Clearance Officer, Office of Information Services.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2012-0277]

Proposed Dewey-Burdock Project in Fall River and Custer Counties, South Dakota, for In-Situ Leach Uranium Milling Facilities

AGENCY: Nuclear Regulatory Commission.

ACTION: Final supplemental environmental impact statement; issuance.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) published the Final Supplemental Environmental Impact Statement (SEIS) (NUREG-1910, Supplement 4) for the Dewey-Burdock In-Situ Uranium Recovery (ISR) Project. By letter dated August 10, 2009, Powertech USA, Inc. (Powertech) submitted an application to the NRC for

a new source materials license for the Dewey-Burdock ISR Project, which Powertech proposes to be located in Fall River and Custer Counties, South Dakota. Powertech is proposing to recover uranium from the Dewey-Burdock Project site using the in-situ recovery process.

ADDRESSES: Please refer to Docket ID NRC-2012-0277 when contacting the NRC about the availability of information regarding this document. You may access publicly-available information related to this action by the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2012-0277. Address questions about NRC dockets to Carol Gallagher; telephone: 301-287-3422; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may access publicly available documents online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided the first time that a document is referenced. The "Final SEIS (NUREG-1910, Supplement 4) is available in ADAMS under Accession Nos. ML14024A477 and ML14024A478.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Ms. Haimanot Yilma, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington DC, 20555-0001; telephone: 301-415-8029, email: Haimanot.Yilma@nrc.gov.

SUPPLEMENTARY INFORMATION: Under the NRC's environmental protection regulations in part 51 of Title 10 of the *Code of Federal Regulations* (10 CFR), that implement the National Environmental Policy Act of 1969 (NEPA), preparation of an Environmental Impact Statement (EIS) or supplement to an EIS (SEIS) is required for issuance of a license to

possess and use source material for uranium milling (see 10 CFR 51.20(b)(8)).

In May 2009, the NRC staff issued NUREG-1910, "Generic Environmental Impact Statement for In-Situ Leach Uranium Milling Facilities" (herein referred to as the GEIS). In the GEIS, NRC assessed the potential environmental impacts from construction, operation, aquifer restoration, and decommissioning of an ISR facility located in four specific geographic regions of the western United States. The proposed Dewey-Burdock ISR Project is located within the Nebraska-South Dakota-Wyoming Uranium Milling Region identified in the GEIS. This final SEIS supplements the GEIS and incorporates by reference relevant portions from the GEIS, and uses site-specific information from the applicant's license application and other independent sources to fulfill the requirements in 10 CFR 51.20(b)(8).

The final SEIS was prepared in response to an application submitted by Powertech by letter dated August 10, 2009. The applicant proposes the construction, operation, aquifer restoration, and decommissioning of an in-situ recovery facility to recover uranium.

The final SEIS was prepared by the NRC and its contractor, the Center for Nuclear Waste Regulatory Analyses (CNWRA), in cooperation with the U.S. Bureau of Land Management (BLM), in compliance with NEPA, and the NRC's regulations for implementing NEPA (10 CFR part 51).

The proposed Dewey-Burdock project will be located approximately 21 km [13 mi] north-northwest of Edgemont, South Dakota, in northern Fall River and southern Custer Counties. The proposed facility would encompass approximately 4,282 hectares (ha) (10,580 acres [ac]), which consists of two contiguous mining units: the Burdock Unit and the Dewey Unit.

The final SEIS is being issued as part of the NRC's process to decide whether to issue a license to Powertech pursuant to 10 CFR part 40. In this final SEIS, the NRC staff has assessed the potential environmental impacts from the construction, operation, aquifer restoration, and decommissioning of the proposed Dewey-Burdock project. The NRC staff accessed the impacts of the proposed action and its alternatives on land use; historical and cultural resources; visual and scenic resources; climatology, meteorology and air quality; geology, minerals and soils; water resources; ecological resources; socioeconomics; environmental justice; noise; traffic and transportation; public
