#### SUPPLEMENTARY INFORMATION:

##### I. Background

FDA is announcing the availability of a draft guidance for industry entitled “Protecting the Rights, Safety, and Welfare of Study Subjects—Supervisory Responsibilities of Investigators.” Under the regulations in part 312 (21 CFR part 312) (Investigational New Drug Application) and part 812 (21 CFR part 812) (Investigational Device Exemptions), an investigator is responsible for ensuring that a clinical investigation is conducted according to the signed investigator statement, the investigational plan, and applicable regulations; for protecting the rights, safety, and welfare of subjects under the investigator’s care; and for the control of drugs, biological products, and devices under investigation (§§ 312.60 and 812.100). This draft guidance clarifies the responsibilities of investigators in the conduct of clinical investigations conducted under parts 312 and 812, particularly the responsibilities to supervise the conduct of the clinical investigation, and to protect the rights, safety, and welfare of study participants in drug, biologic, and medical device clinical trials. The draft guidance also provides recommendations on how investigators should supervise the study-related actions of persons not in the direct employ of the investigator, including certain study staff and parties conducting associated testing and assessments.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the agency’s current thinking on the supervisory responsibilities of investigators. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.
