SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information

collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Electrical Protective Equipment Standard (29 CFR 1910.137) and the Electric Power Generation, Transmission, and Distribution Standard (29 CFR 1910.269) specify several paperwork requirements. The following describes the information collection requirements contained in the standards and addresses who will use the information.

Electrical Protective Equipment Standard (§ 1910.137)

Testing Certification (§ 1910.137(b)(2)(xii))

Employers must certify that the electrical protective equipment used by their workers have passed the tests specified in paragraphs (b)(2)(viii), (b)(2)(ix), and (b)(2)(xi) of the Standard. The certification must identify the equipment that passed the tests and the dates of the tests. This provision ensures that electrical protective equipment is reliable and safe for worker use and will provide adequate protection against electrical hazards. In addition, certification enables OSHA to determine if employers are in compliance with the equipment-testing requirements of the Standard.

Electric Power Generation, Transmission, and Distribution Standard (§ 1910.269)

Training Certification (§ 1910.269(a)(2)(vii))

This provision requires employers to certify that each worker has received the training specified in paragraph (a)(2) of the Standard. Employers must provide certification after a worker demonstrates proficiency in the work practices involved.

The training conducted under paragraph (a)(2) of the Standard must ensure that: Workers are familiar with the safety-related work practices, safety procedures, and other procedures, as well as any additional safety requirements in the Standard that
