

agreed upon by the interviewer and the respondent.

A list of potential respondent addresses and telephone numbers will be purchased from Survey Sampling, Inc. located in Fairfield, Connecticut. The key community contact will publicize the information collection through his or her contacts in the community and via word of mouth.

Interviewers will send letters to potential respondents explaining the survey and the dates on which the interviewer will conduct field interviews. Follow-up phone calls will be made to help ensure potential respondents are aware of the information collection and the dates on which the interviewer will conduct the survey. The survey instrument will be translated into Spanish. Respondents will have a choice of responding in Spanish or English. The graduate student interviewer is fluent in both English and Spanish.

The number of respondents comprising the sample size is based on an estimate of the Hispanic population in Gainesville. Based on census figures, we know that approximately 64 percent of the population is comprised of Hispanics 18 years of age or older. The sample size calculation assumes a 5 percent margin of error and the 95 percent confidence level. Sample size is based on the following equation:

$$n = 4P*Q/.0025$$

Where n = sample size, P = proportion of population with the characteristic, i.e., percent Hispanic; Q = proportion of population without the characteristic, i.e., not Hispanic. The sample size is calculated at 368 ($n = 4*.64*.36/.0025$). The resulting calculation is rounded down to 300 because of logistical limitations associated with collecting door-to-door interviews.

Forest Service managers would use this information to develop outreach strategies designed to encourage greater Hispanic participation in urban forest stewardship. Specifically, this involves developing programs to promote volunteerism and community participation. In cooperation with state forestry agencies and municipal parks agencies, the Forest Service will provide technical advice to communities to ensure that urban green projects are environmentally feasible.

Tabulation and analysis of the quantitative data will be performed by researchers with the Forest Service in Athens, Georgia, and the University of Georgia geography department. Statistical analyses include means difference tests, Chi-square tests, and multivariate regression. Journal articles

will be drafted to report the more significant methodological or theoretical findings.

If the information proposed herein is not collected, data concerning Hispanic perception and use of the urban forest will not be available to the Forest Service. The resources specified in this proposal are not federally managed. However, federal resources and programs provide partial support for their continuance.

The agency is committed to encouraging more participation in tree stewardship by urban communities, including minority and ethnically diverse populations. In order to achieve this goal, the agency must have better information on how specific groups interact with the urban forest.

Estimate of Annual Burden: 15 minutes.

Type of Respondents: Hispanic residents in Gainesville, Georgia.

Estimated Annual Number of Respondents: 300.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 75 hours.

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the agency, including whether the information will have practical or scientific utility; (2) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Use of Comments

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission requesting Office of Management and Budget approval.

Dated: January 25, 2005.

Ann M. Bartuska,

Deputy Chief for Research & Development.
