II. Background

Federal Guidance Report No. 14: Radiation Protection Guidance for Diagnostic and Interventional X-Ray Procedures is an update to the 1976 x-ray guidance in Federal Guidance Report No. 9, which provides federal facilities that use diagnostic and interventional x-ray equipment with recommendations for keeping patient doses as low as reasonably achievable without compromising the quality of patient care.

The EPA-led Interagency Steering Committee on Radiation Standards (ISCORS) Work Group that developed Federal Guidance Report No. 14 included medical and radiation protection professionals from EPA, the Department of Health and Human Services, the Department of Veterans Affairs, the Department of Defense (Departments of the Army, Navy, and Air Force), the Occupational Safety and Health Administration and the Commonwealth of Pennsylvania.

On April 3, 2013, a proposed version of this guidance was published in the **Federal Register**, opening a 60 day public comment period. The ISCORS work group reviewed more than 900 comments, updating the document to

address the feedback from the public and medical community.

This guidance will be issued to all federal facilities that perform diagnostic or interventional x-ray procedures. The recommendations in this guidance are not binding on any agency, but, at an agency's discretion, may be incorporated in whole or in part into their standard operating procedures or orders. Likewise, EPA hopes that the states and the private sector will find this guidance to be a useful reference, but there is no legal obligation for them to make use of it in any way; however, if followed, this guidance will improve the safety of diagnostic and interventional imaging.

The complete Federal Guidance Report No. 14: Radiation Protection Guidance for Diagnostic and Interventional X-Ray Procedures (EPA 402-R-10003, November 2014), can be accessed at <http://www.epa.gov/radiation/federal/fgr-14.html>.
