

provide comments (*i.e.*, opinions) on publicly available scientific data in SRDR. Registration data will be collected from these users; (3) “General public” users only view scientific data publicly available in SRDR. No data will be collected from these type of users.

All Contributors and Commentators will undergo a simple self-registration process by providing a username, password, email address, and institution. Collection of registration data from Contributors and

Commentators is required due to the use of SRDR both as a database and as a tool for assisting in the production of a SR, including providing comments in the various sections of a particular project on SRDR. In addition, provision of an email address and institution information allows the administrators of SRDR to confirm that requests are being made by actual people and not potentially malicious software code such as bots and other cybersecurity threats.

Estimated Annual Respondent Burden

Exhibit 1 shows the estimated annualized burden hours for the respondents' time to participate in the SRDR. In 2017, 176 users registered as Commentators and 206 users registered as Contributors. Registration will take approximately 2 minutes per user. We thus calculate the total burden hours required for registration for all users annually is 12.73 hours.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Hours per response	Total burden hours
Registration of users as Commentators or Contributors	382	1	2/60	12.73
Total	382	12.73

Exhibit 2 shows the estimated cost burden associated with the respondents'

time to participate in the SRDR. The total cost burden to respondents is

estimated at an average of \$501.82 annually.

Background on the CPSTF: The CPSTF is an independent, nonfederal panel whose members are appointed by the CDC Director. CPSTF members represent a broad range of research, practice, and policy expertise in prevention, wellness, health promotion, and public health. The CPSTF was convened in 1996 by the Department of Health and Human Services (HHS) to identify community preventive programs, services, and policies that increase healthy longevity, save lives and dollars, and improve Americans' quality of life. CDC is mandated to provide ongoing administrative, research, and technical support for the operations of the CPSTF. During its meetings, the CPSTF considers the findings of systematic reviews on existing research and practice-based evidence and issues recommendations.

CPSTF recommendations are not mandates for compliance or spending. Instead, they provide information about evidence-based options that decision makers and stakeholders can consider when they are determining what best meets the specific needs, preferences, available resources, and constraints of their jurisdictions and constituents. The CPSTF's recommendations, along with the systematic reviews of the evidence on which they are based, are compiled in the *The Community Guide*.

Matters proposed for discussion: Cancer Prevention and Control; Obesity Prevention and Control; Pregnancy Health; and Tobacco Cessation.

The agenda is subject to change without notice.
