I. Background

On June 15, 2023, we published a disapproval of two submittals intended to satisfy the contingency measures requirement of CAA sections 172(c)(9) and 182(c)(9).¹ This disapproval was based on our finding that the State’s submittal did not include specific measures to be triggered upon a failure to attain (“attainment contingency measures”) or to meet a reasonable further progress (RFP) milestone (“RFP contingency measures”). The 2023 disapproval action started sanctions clocks for imposition of the offset sanction 18 months after July 17, 2023, and the highway funding sanction six months later, pursuant to CAA section 179 and our regulations at 40 CFR 52.31. Under 40 CFR 52.31(d)(1), the offset sanction applies 18 months after the effective date of a disapproval and the highway funding sanction applies six months after the offset sanction, unless we determine that the deficiencies forming the basis of the disapproval have been corrected. Accordingly, the offset sanction went into effect for the area on January 17, 2025, and the highway funding sanction is set to come into effect on July 17, 2025.

In the Proposed Rules section of this issue of the **Federal Register**, we are proposing to determine that the Sacramento Metro area attained the 2008 ozone NAAQS by its December 31, 2024 attainment date, based on quality-assured and certified ambient air quality monitoring data from 2022 through 2024. If we finalize that attainment determination as proposed, the requirement for the area to have RFP and attainment contingency measures for the 2008 ozone NAAQS will no longer apply. Based on our proposed determination, we are taking this interim final action, effective on publication, to stay the imposition of the offset sanction and to defer the highway funding sanction that were
