

dramatically with the passage of the Government Performance and Results Act (GPRA) in 1993. GPRA focuses new attention on the quality of outcome measures used to collect information about publicly funded programs. Programs that provide services to persons who are homeless and have serious mental illnesses are facing greater need to document their effectiveness. These outcome data will ultimately be used in responding to Congressional and HHS oversight, GPRA requirements, and the requests of other governmental levels, managed care companies, and private funding sources.

The project will test the appropriateness and feasibility of selected indicators to measure the outcome of services to persons who are homeless and have serious mental illnesses. Outcome measures to be evaluated include housing status,

sobriety or drug-free status, mental health treatment status, enrollment in an educational program, and employment.

In addition, the project will evaluate process measures pertaining to outreach, service delivery and linkage stages of intervention. These process indicators include the type of contact (*i.e.*, referrals, walk-ins, fixed outreach, and mobile outreach); whether the person contacted agreed to services, reasons for any non-enrollment, and referral to, and provision of, specific services.

The project will test these outcome and process measures in a total of approximately six provider agencies in each of five participating States. The findings of the pilot test will serve as the basis for recommendations for a voluntary national implementation of data collection in similar programs, nationwide. It will also test the

feasibility of compiling such data in a central data collection point.

Local providers will report information on services provided to individuals served. Providers will report aggregate information from their records for all new clients during a one-month period. Information will be reported on the initial client contact, on services clients receive over the next six months and on client outcomes at the end of six months. In addition, half of the provider agencies will report client followup information at a period 60 days after the conclusion of the six-month period. It is anticipated that this information will be collated from existing provider records. Data will be submitted to the central data point in aggregate form, not by individual client. Projected response burden for the project is summarized in the table below.

	Estimated number of respondents	Estimated number of responses per respondent	Average burden hours per response	Estimated total annual burden hours requested
Initial and six-month aggregate report .....	30	1	10	300
Follow-up aggregate report .....	15	1	10	150

**SUPPLEMENTARY INFORMATION:**

Mandatory Guidelines for Federal Workplace Drug Testing were developed in accordance with Executive Order 12564 and section 503 of Pub. L. 100-71. Subpart C of the Guidelines, "Certification of Laboratories Engaged in Urine Drug Testing for Federal Agencies," sets strict standards which laboratories must meet in order to conduct urine drug testing for Federal agencies. To become certified an applicant laboratory must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification a laboratory must participate in a quarterly performance testing program plus periodic, on-site inspections.

Laboratories which claim to be in the applicant stage of certification are not to be considered as meeting the minimum requirements expressed in the HHS Guidelines. A laboratory must have its letter of certification from SAMHSA, HHS (formerly: HHS/NIDA) which attests that it has met minimum standards.

In accordance with Subpart C of the Guidelines, the following laboratories

meet the minimum standards set forth in the Guidelines:

The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. DHHS, with the DHHS' National Laboratory Certification Program (NLCP) contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, the DHHS will recommend that DOT certify the laboratory (**Federal Register**, 16 July 1996) as meeting the minimum standards of the "Mandatory Guidelines for Workplace Drug Testing" (59 **Federal Register**, 9 June 1994, Pages 29908-29931). After receiving the DOT certification, the laboratory will be included in the monthly list of DHHS certified laboratories and

participate in the NLCP certification maintenance program.
