

creating a secure website to receive these reports. Again, in response to public comments, NSF created a secure website for reporting, and we ask NASA to do the same. NASA's expectations about what should occur if a reportable instance happens at a subrecipient institution is not clear. The Notice reads: "(d) Recipient agrees to insert the substance of this term and condition in any subaward/subcontract involving a co-investigator."

Recipient will be responsible for ensuring that all reports, including those related to co-investigators, comply with this term and condition." This could mean a number of different things, including:

- a. The subrecipient institution is responsible for submitting reports to NASA, or
- b. The subrecipient institution must provide information to the recipient, who ensures that all required data elements are included prior to the recipient submitting the report, or
- c. The subrecipient institution must provide information to the recipient, who ensures that all required data elements are included prior to the subrecipient submitting the report, or
- d. The subrecipient institution must provide a certification to the recipient institution that, should the subrecipient make a report to NASA, it will do so in compliance with the reporting requirements.

As written, the language does not provide clear direction to the recipient and subrecipient. An area of concern is privacy. Should an administrative action be taken or administrative leave imposed in anticipation of investigating an allegation, the investigation may result in a conclusion that a violation did not occur. In this case, an individual's reputation may be harmed if entities other than those with a need to know are privy to the information. NASA should clarify expectations and responsibilities for both the recipient and subrecipient and do so in a manner that protects privacy. To align with NSF, we recommend that NASA consider requiring that reports be submitted directly from the subrecipient to NASA.

NASA Response: In response to the recommendation that NASA create a secure website to receive these reports, NASA has developed a secure mechanism by which the notifications will be routed directly to the Office of Diversity and Equal Opportunity, which will limit access to only those NASA personnel with an express need to know. NASA also has revised the term and condition to make clear to those submitting notifications not to include

names other than the PI or Co-I. In response to the recommendation that NASA should clarify expectations and responsibilities for both the recipient and subrecipient, NASA has revised the term and condition to require the Authorized Organizational Representative of the subrecipient institution to notify NASA directly.

Federal Register Liaison Officer.
