

NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart O.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Respondents/Affected Entities: Owners or operator of commercial ethylene oxide sterilization and fumigation operations.

Estimated Number of Respondents: 122. "Burden" is defined at 5 VFR 1320.3(b).

Frequency of Response: Initially, occasionally and semiannually.

Estimated Total Annual Hour Burden: 8,887.

Estimated Total Annual Cost: \$1,524,913, which includes \$860,413 in labor costs, \$65,000 in capital/startup costs, and \$599,500 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment increase in burden for both the respondents and the Agency from the most recently approved ICR. This is not due to any program changes. The increase is due to an update in labor rates and an increase of three respondents subject to the regulation since the last ICR. This results in an increase in respondent and Agency labor hours, costs, and total O&M costs.

Acting Director, Collection Strategies
Division.

Incineration Units (40 CFR Part 60, Subpart CCCC) (Renewal)" (EPA ICR No. 1926.06, OMB Control No. 2060-0450) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through June 30, 2013. Public comments were previously requested via the **Federal Register** (77 FR 63813) on October 17, 2012, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. public docket, visit <http://www.epa.gov/dockets>.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart CCCC. Owners or operators of the affected facilities must submit an initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Owners or operators of commercial and industrial solid waste incineration units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart CCCC).

Estimated number of respondents: 30 (total).

Frequency of response: Initially, occasionally, semiannually and annually.

Total estimated burden: 5,965 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$959,788 (per year), includes \$382,200 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase in the Agency costs from the most recently approved ICR due to an increase in labor rates. This ICR uses updated labor rates in calculating all burden costs.

Additionally, when compared to the previous ICR, there is a decrease in respondent burden and an increase in the total O&M costs. The previous ICR included contractor labor costs associated with initial emissions testing and annual stack testing under Table 1, Annual Respondent Burden and Cost. Since the contractor labor costs apply solely to capital/startup and O&M activities, we have revised the ICR to reflect contractor labor costs under their respective capital/startup and O&M activities, and also have updated the associated contractor labor burden rate.

There is also a decrease in capital/startup costs in this ICR as new sources will become subject to the 2013 standards and will not have burden

associated with capital/startup under this NSPS.

Title: NESHP for Mineral Wool Production (Renewal).

ICR Numbers: EPA ICR Number 1799.08, OMB Control Number 2060-0362.

ICR Status: This ICR is scheduled to expire on June 30, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NESHP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart DDD.

Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results.

Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Respondents/Affected Entities:

Owners or operator of mineral wool production facilities.

Estimated Number of Respondents: 6.

Frequency of Response: Initially and semiannually.

Estimated Total Annual Hour Burden: 1,581. "Burden" is defined at 5 CFR 1320.3 (b).

Estimated Total Annual Cost:

\$157,566, which includes \$153,066 in labor costs, no capital/startup costs, and \$4,500 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the respondent labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) The reporting requirements have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall labor hours. However, there is an adjustment increase in the respondent labor costs due to the use of updated labor rates.

There is a decrease in Agency labor hours and costs due to a mathematical correction. The previous ICR incorrectly calculated the number of hours associated with review of excess emissions reports. This ICR corrects the error, which results in a decrease of 55 hours and an associated decrease in labor costs.

Acting Director, Collection Strategies Division.
