

used to guide the evaluation. Information for the service/agency and system level evaluations will be collected by staff from the central Evaluation Center (EC) during annual site visits and through monthly activity logs. Common site visit protocols will dictate what data collection methods will be used. Site visitors will rely on focus groups and interviews to obtain information from project directors, local evaluators, project staff, and clients. Activity logs monitoring each

community's efforts to implement collaboration strategies, will be completed by program administrators and submitted to the EC monthly. Key outcomes to be examined at the service/agency level through these data collection methods include increased availability of mental health, substance abuse, specialty care, housing and services; increased access to primary care, mental health, and substance abuse services; more comprehensive assessment of and services for

individual needs; increased integrated delivery of services; and increased engagement and retention in services. System-level outcomes to be examined include increased cross-agency activity; increased mental health capacity at Hch sites; less redundancy in data collection; and enhanced screening for multi-dimensional issues.

The estimated response burden for this project is as follows:

Instrument	Number of respondents	Responses/ respondent	Burden/re-sponse (hrs.)	Total burden hours
General Session Interviews	84	3	1.5	378
Administrative Interviews	24	3	1.5	72
Evaluator Interviews	12	3	1.0	36
Line Staff Interviews	48	3	2.0	288
Consumer Focus Groups	252	1	1.0	252
Other Key Informants	48	3	1.0	144
Monthly Activity Logs	12	28	0.5	168
Total	564			1,842
3-yr. Annual Average	480			614

A total of approximately 6,500 program participants are expected to be recruited from the 12 sites. Each site will collect GPRA data on these participants using the CMHS GPRA Core Client Outcome measures approved by the Office of Management and Budget under control number 0930-0208, which cover such domains as drug and alcohol use, family and living conditions, education, employment, and income, crime and criminal justice status, and mental and physical health problems and treatment. To obtain information on client-level outcomes the central Evaluation Center will work with each site to develop methods for obtaining relevant material from the GPRA data. The Evaluation Center will provide training and technical assistance to all sites on data submission procedures.

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to: Allison Herron Eydt, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503.
